"All Things Come From the Earth"

By Phil Blakney

From all over the world agents of pharmaceutical research organizations are sending back thousands of different samples of earth. They are collected from back yards, forests, jungles, farms, etc.

Millions of dollars are spent to analyze them with the hopeful wish that a better anti-biotic may be discovered. Perhaps even cancer may be cured someday by something from the earth.

One thing we do know. New medicines are being perfected rapidly, and as soon as they are approved for safe use, we stock them in our pharmacy.
