SUCCESSFUL EVACUATION of a large city would leave the downtown area a ghost town, as in this view of Portland, Ore., taken during Operation Greenlight—the largest civil defense evacuation exercise to date. The vast Interstate Highway System under construction would not only facilitate evacuation of large cities, but also would provide roads needed to supply the huge evacuee camps in outlying areas. # "We Were Amazed"

Says CAR LIFE,  
The Family Auto Magazine

We were amazed as we drove the Special four-door hardtop, to find that an automobile could be completely changed yet retain so much of its former appearance and character. The 1957 models have all the familiar, solid Buick virtues.

THE ABOVE brief clipping tells you worlds about the '57 Buick.

It tells you we went all out to make this car completely new—yet we didn't sacrifice a single Buick virtue.

So you still get that unmistakable Buick styling.

You still get that big-car room and comfort and that solid Buick quality.

But you also get so complete a change in the vitals of this car that the driving of it is a wondrous new experience.

You get a brilliant brand of performance that's different from anything else that goes on four wheels.

Words won't describe it. Telling you there's an all-new engine, an instant new Dynaflo,\* a completely new power train—none of that will convey this news to you.

What you have to do is get in this car and drive it. Drive it around the block, through town, out on the highway. Actually feel what happens when you press the gas pedal, turn the steering wheel, touch those powerful new brakes.

Then—and not till then—will you know why folks call this "the dream car to drive."

The best advice we can give you, by far, is this: **Ask your dealer for a trial run today.**

\*New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It is standard on Roadmaster, Super and Century—optional at modest extra cost on the Special. Safety-Buzzer is standard on Roadmaster, optional at extra cost on other Series.

Exclusive With Buick  
**SAFETY-BUZZER\***  
—the "built-in conscience" that buzzes when you reach the miles-per-hour you want to stay under, keeps silent when you drop below that pace.

WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM
