Weariness Without Cause Indicates Disease

By Phil Blakney

To be tired after exertion is normal, but to be always weary is a symptom of possible future trouble. If this condition persists it is wise to consult your physician. Do not depend on self treatment or advice from well meaning, but inexperienced friends.

Most of the medicines your physician prescribes can only be dispensed by us in a prescription because their potency and strength requires that they be taken only while under a physician's care. That is why prescriptions give better results. Home treatment drugs that you can get without a prescription are usually never as effective.

Your Physician Can Phone 6-9962 When You Need A Medicine

Pick up your prescription if shopping near us, or let us deliver promptly without extra charge. A great many people entrust us with the responsibility of filling their prescriptions. May we compound yours?
