NOW! You can afford WARM FLOOR HEATING in every room!

JUST LIKE A FURNACE... BUT WITHOUT ALL THE COSTLY, DIRT COLLECTING PIPES AND REGISTERS

SIEGLER has TWO heatmakers working together on ONE fire to heat every room in your home!

Tropical Floor Heat

QUICKLY GETS TO THE BOTTOM OF THE COLD FLOOR PROBLEM

But **ORDINARY HEATERS** cannot and do not give you warm floor heating in every room because they waste heat up the chimney and on the ceilings.

Sieglers is not a space heater that wastes heat forcing you to live in one or two rooms with cold floors.

Sieglers is not a central heating plant with expensive installations!

SIEGLER is the revolutionary method of **WARM FLOOR HEATING in every room!** BUT WITHOUT PIPES AND REGISTERS!

SIEGLER PAYS FOR ITSELF AGAIN AND AGAIN WITH THE FUEL IT SAVES.

AND LOOK—don't let BTU Ratings confuse you!
There is BTU INPUT... there is BTU OUTPUT, but what keeps your family warm is BTU USEPUT... the working BTU's that heat your home! In BTU USEPUT Sieglers OUTHEATS 'EM ALL! A 50,000 BTU Sieglers gives more USABLE HEAT than much higher rated ordinary heaters. A 75,000 BTU Sieglers furnace-volume heater can only be compared to a central heating plant.

MONEY BACK GUARANTEE
Your dealer for a NOT DEMONSTRATION—for full information write SIEGLER—Centralia, Ill.

Now Standard refines a rare "rock" to give U.S. a new source of gasoline

High pressure water jet shatters solid Gilsonite. Plume hose washes particles down mine floor to pipeline.

Petroleum products are now being made without crude oil. Standard found the answer in a rare hydrocarbon called Gilsonite. But it took \$16,000,000 and a vast research program to do it. Deep in the mountains of Utah our scientists worked out a better, faster way to mine Gilsonite. Meanwhile our engineers designed the nation's first pipeline capable of carrying solids suspended in water... over a rugged terrain to a spot 72 miles away.

There Standard* built the nation's first privately financed refinery to make petroleum products from a material other than crude oil. Today that refinery turns Gilsonite into high octane gasoline for motorists, and the purest coke known for making steel, aluminum and other metals. In our country's search for new sources of fuel, the development of Gilsonite is a major breakthrough. It means the equivalent of 100,000,000 barrels of oil added to U.S. underground reserves—important help in meeting our country's growing petroleum needs.

Progress in the West means...

New sources of gasoline to fuel 5½ million more motor vehicles by 1965†

1957 1965

†In 11 Western States

*Through American Gilsonite Company, a Standard affiliate
