Pears Embellish Ham Steak

Golden California Bartletts basted with this good honey-soy sauce can be broiled right along with a juicy ham steak or, for that matter, any other kind of meat or poultry. They are so satisfyingly sweet that a dessert can be easily omitted.

Pears served right along with the main course may not be a new idea, but the combination no longer has a fancy-for-company limitation. The millions of weight-watchers in this country are interested in the kind of light, healthful meals that don't go to their hips. A good-sized California Bartlett, only about 70 calories, provides quick energy and substance. The delicate sweet flavor of the pears actually heightens the flavor of other foods while unobtrusively cutting the craving for a sweet dessert.

Honey Soy Pears

Cut four fresh California Bartletts in half and remove cores (1/2 teaspoon measuring spoon does a neat job). Squeeze lemon juice over surfaces and brush lightly with a mixture of 2 tablespoons honey, 2 tablespoons soy sauce, 1 teaspoon powdered ginger and 1 tablespoon water. Dot pears with butter or margarine and broil 3 or 4 inches from flame until tender, basting once or twice.

"The Shortest Way to Do Many Things is to do one Thing at a Time"
 By Phil Blakney
 Prescriptions cannot be mass produced on assembly lines. Each one must be compounded individually because it is specifically written for one person. For that reason it usually shortens sickness time.
 Invariably the medicines in a prescription give relief much more quickly than patent medicines or home treatments. Your physician's skilled diagnosis usually prevents serious sickness—if you consult him at the first sign of trouble. The shortest way to continued better health is to do this one thing first—consult your physician when sick.
 YOUR PHYSICIAN CAN PHONE 6-9962 WHEN YOU NEED A MEDICINE
 Pick up your prescription if shopping near us, or let us deliver promptly without extra charge. A great many people entrust us with the responsibility of filling their prescriptions. May we compound yours?
