

Mustangs Lose Hard Fought Games Against Echo And Stanfield Teams

The Mustangs played three and a half quarters of good ball against both Echo and Stanfield, but the last minutes were bad for them and they ended up losing both games by almost identical scores: 51-43 and 51-42.

Heppner went into the Echo game tied for first place in the league and hoping to break the jinx that Echo has had on Heppner teams for many years.

The first half was fairly close except for the middle of the second period when Echo got 9 points ahead. Heppner came right back as good as ever and

shortened the lead to 3 points at the half, 29 to 23.

The second half saw the Mustangs play good steady ball and were down only two points at the end of the third stanza. In the first part of the final quarter Heppner took a lead of 36-34 and it was a see-saw battle until the score was 39-41 Echo leading. The next few minutes went by without Heppner scoring and the Cougars taking a 39-45 lead. The game was all but over as the Mustangs tried but could not catch up and they lost, 43-51 with the jinx still holding. High for Heppner was Croshens with 14 while high for Echo was Campbell with 18.

At Stanfield the Mustangs were trying their hardest and they really had Stanfield scared as they took a 14-11 first quarter lead and had them 19-14 in the middle of the second period. Stanfield came clawing back and before the Mustangs knew what hit them, they were behind 28-25 at halftime.

After the halftime session, the Mustangs began to look like a team again and pulled up to within one point at the end of the third stanza with the score of 34-35. The next few minutes saw the lead change a dozen times. Then, just as the night before, the Heppner team was stopped dead but Stanfield kept pouring them in and went on to win by 51-42. Top scorer was Morris with 15 and Ruhl next with 12. Evans was tops for Stanfield with 22.

The "B" squad won a come from behind with Echo 39-33 but lost to Stanfield 14 to 36. The boys showed great spirit and are the fellows to be watched Friday and Saturday nights.

ORBIT HEARING

Who wouldn't be surprised to hear with a pair of glasses you can't see through (not blindfolded, anyway). The fact is this astonished girl is hearing everything with nothing in her ears, thanks to Sonotone's new bone-conduction eyeglass hearing aid. Although nothing is worn in either ear, you can use both ears to hear sounds from every direction around you. This is binaural, or orbit, hearing, the same way that persons with normal hearing listen. Yet everything is concealed in stylish, prescription-fitted glasses.

PP-130

MR. HARRY BOSTRON
Manager of Sonotone of Walla Walla, will be at the

To Meet Your Growing Use of Power...

\$56 MILLION IN CONSTRUCTION CARRIED OUT BY PP&L IN 1957

PP&L's construction program hit an all-time high in 1957 with \$56,000,000 spent toward providing more and better electric service for 277,000 customers.

In 1958 this forward-looking development program will see construction expenditures of \$58,900,000 and three new PP&L power installations completed and put into service. The world's highest earth-fill dam will be finished at the Swift site on the Lewis River, a new generator will go into service at the pioneer Merwin plant; and a large, modern steam-electric plant will begin turning out power in Wyoming.

These power developments will mean 350,000 new kilowatts ready to work for you—in your home, in business and in industry.

And still more projects are in the planning and exploration stages as Pacific Power carries on its big job of building—today—for your power needs of tomorrow!
