The lifelines of your country are threatened...

You can do something about it!

The railroads are the second largest industry in the nation, and are the fourth largest employer. They are one of the country's largest purchasers of lumber, steel, oil and many other basic products. Their tax payments in your state, county, city or town lend substantial support to your schools and other civic projects.

For years upon years, the railroads have been operating and attempting to compete under the burdens of out-moded legislation and regulation. At the same time, they have been doing everything possible to give you better transportation service — and fighting to keep from being annihilated by their subsidized competitors.

The country is now at the crossroads. The crisis is here, now.

Down one road is the ultimate destruction of the railroads as a private industry, the nation's most vital transportation link . . . its very lifeline.

Up the other road is the greatest good for you, your community, state and all America . . . a highly efficient, economical service geared to today's transportation needs.

Which is it to be? You can give the answer.

NOW IS THE TIME --- TODAY

Write to your Senators and Representatives in Washington. Let them know that you recognize the vital part your railroads perform in a prosperous America. Ask that they be given the right to serve in fair competition.

Ask your Senators to support S.3778, and your Representatives to support H.R.12488.

ROCK HOUND'S CORNER

By JOHN NEWMAN

Have you your pick ready? This Sunday you know is the potluck picnic rock hunting field day. This time we won't need the pack unless this spot happens to be picked out, if it is maybe you'd better bring the old sack along. We might want to explore a little and you never know what you might want to bring out.

Most of the graveled roads are in good shape, but some of the dirt roads get a little slick yet, with just a little shower. It would be advisable to carry chains if you have the least inclination to get off on dirt roads. Thunder showers can come up quickly at this time of year.

The potluck lunch is pretty well planned at this time. If you haven't been told what to bring it is likely that you or your phone has been out. If you are in doubts call Ethel Newman or Alta Edgers.

Our next meeting is Saturday,

From where I sit... by Joe Marsh

The Woodchuck Wouldn't "Chuck"

Lady called up our newspaper and asked how to get a woodchuck out of her garage. I referred her to young Chip Wilkins, our Field and Wildlife Editor.

"That's easy," says Chip. "Just roll some bread into pellets, and make a trail of them leading out of the garage."

Next day she called Chip again. "You sure are smart," she coo-ed, "to know a woodchuck will follow a trail of breadcrumbs. Now I've got two woodchucks in the garage!"

From where I sit, sometimes "expert advice" turns out to be not so expert. Reminds me of those who are always ready to advise us how to relax...how to work...whether or not to prefer coffee (for instance) to a glass of beer. I think a lot of us ought to think twice before advising people to do this thing or that thing. In the long run, it will make us all better neighbors.
