The above is a sad story of our friend who smoked in bed, but it's a good way to let you know that this week, October 5-11, 1958 is National Fire Pre- vention Week.

Home and farm fires are siz- able factor in Oregon's economy. The loss runs into millions of dollars. A business is considered to be poorly managed and a poor risk, if fire prevention does not get a share of management's at- tention. Homes and farms should take the same attitude.

There were 12,000 Oregon home fires last year. Odds are better than 1:50 that fire will strike the average Oregon dwelling in the next 12 months. Fire hit 34 Oregon homes per day in 1957. A total of 12,211 fires occurred

crossing the street in Hood River, Miss Barnett fell fracturing a hip. She was taken to the Emanuel hospital in Portland by ambu- lance and is scheduled for sur- gery Monday morning. Mrs Nor- ma Marquardt and Miss Barnett and sister, Mrs Parker were re- turning home from a business trip to Portland.

Rev Norman Northrup visited Miss Dona Barnett at the Eman- uel hospital in Portland on Mon- day. Bertha Hunt and Delpha Jones accompanied him to Port- land all returning Monday night.

Mrs Ralph Jackson of Hermis- ton was a Lexington caller on Sunday.

Mr and Mrs O G Breeding were Bend visitors on Saturday.

Dates To Remember:

October 14—P-TA at the school auditorium.

October 21—Women's Fellowship group.

"Chats With Your Home Agent"

By ESTHER KIRMIS

He brushed his teeth twice a day.

The doctor examined him twice a year.

He wore rubbers when it rained.

He slept with the windows open.

He stuck to a diet with plenty of fresh vegetables.

He relinquished his tonsils and traded in several worn out glands.

He golfed, but never more than 18 holes.

He never drank, or lost his temper.

He did his daily dozens daily.

He got at least eight hours' sleep every night.

The funeral will be held next Wednesday. He is survived by 18 specialists, four health institu- tutes, six gymnasiums, and num- erous manufacturers of health foods and antiseptics. He had forgotten and fell asleep while smoking in bed!

in dwellings and apartments cov- ered by insurance with many additional fires in non-insured homes. The state fire marshall report is the source of these fig- ures.

Causes Of Oregon Residential Fires in 1957

Careless smoking and matches, 25%; Oil, hot grease, tar, etc. (ignition of) 19%; Hot metals, including electrical devices, 18%; Stoves, furnaces, chimneys, flues —overheated or defective, 15%; Hot ashes and coals, open fires, 10%; Electricity, defective wiring, 5%; Conflagration, exposure, 4%; sparks on roof (1%); Open lights (1%); Spontaneous com- bustion; Incendiarism; Explosions; Etc, 4%.

Note that a few main causes are heavily responsible for fires that damage homes. If you re- move the hazards of smoking, matches, heating units, use and storage of oils, electrical devices and wiring, and open fires and hot ashes, you have hardly any fire danger left.

Four Times As Dangerous as Hunting

People are rightly concerned about safety when hunting. Yet each year Oregon home and building fires kill four or five times as many as do the hunting accidents.

Fires killed 62 Oregonians last year; 51 died in home fires and 7 more in other building fires.

Seventeen of these fire fatali- ties resulted from careless stoves and furnaces.

1 1/2 Million Dollar Loss Per Month
Oregon's total fire loss on in- sured property in 1957 was \$14, 941,540. Homes accounted for 6, 591,406.
