"Never Take Counsel Of Your Fears"

By Phil Blakney

Fear is a bad adviser, particularly when your health is concerned. Some people are afraid to consult a physician when sick. They fear they may have a serious trouble and are afraid to find out the truth.

A physician can soon relieve fear, by accurately diagnosing the cause of the sickness, which then probably can be soon cured. Even if the sickness were one of the few incurables, an early diagnosis and proper treatment would make it easier to live an almost normal life. Depend on your physician and the medicine he will prescribe.
