## Nothing Beats Rain, But...

**NITROGEN** is essential for maximum yields from cash crops

Next to moisture, nitrogen is the most important factor influencing crop yields. Phillips 66 Agricultural Ammonia is 82% nitrogen, the most concentrated form of nitrogen fertilizer available. It encourages development of longer, stronger root systems that can make better use of essential moisture.

TESTS SHOW: fertilized roots (right above) are longer, heavier than unfertilized roots (left).

Phillips 66 Agricultural Ammonia can be applied by injection or by metering into irrigation water. Plan now to get higher yields and bigger profits from all your cash crops by applying Phillips 66 Agricultural Ammonia.

## LESABRE, the Buick you can own

for only \$200 more

than the best models of the leading low-priced cars...

This is in no way a "stripped" car you're looking at. Come in and study the manufacturer's suggested retail price of a Buick LeSABRE like this, equipped with Twin Turbine automatic transmission, radio, heater, white sidewall tires, and anything else you want in your next car. Then do the same to the top models of the leading low-priced three, and you'll find the statement above stands up.

What a difference for only \$200!

Now think how much more you'd enjoy a Buick. A comfortable, substantially built automobile. A car with the finest ride in all Buick history. A car with Buick's exclusive fin-cooled brakes, and the smoothest type of transmission

money can buy. A wonderfully quiet and greatly respected car!

Owners report QUALITY outstanding

Your money in a Buick today puts you on the ground floor of what promises to be a long new time of leadership for Buick cars. "My sixth Buick and the best I ever owned!" . . . "Best-operating car I've driven in thirty years!" . . . "Much the best Buick yet!" . . . Reports like these mean extra pleasure in your Buick ownership . . . and they mean hard dollar value when the time comes to trade. It all adds up to the best proof in 50 years that: "WHEN BETTER AUTOMOBILES ARE BUILT, BUICK PEOPLE WILL BUILD THEM!"

New in gas economy, too!

In planning the '59 Buick, the new Wildcat engines, transmissions, and axles were all engineered to work together for greater gas mileage. Across the country owners tell us they are getting 15 to 20 miles per gallon in the '59 Buicks. And in a recent thorough test of Buick LeSabre against another car of comparable size and a good reputation for economy . . . the Buick won in every case under all kinds of driving conditions.

So we think we've got a new kind of value in this Buick LeSabre. And we suggest you go to your Quality Buick Dealer's and see whether you agree before you buy a new car.
