"The Practice Of Medicine Is A Thinkers Art"

By Phil Blakney

If you have headaches often, it is not enough to just get relief from the pain. The cause must be discovered and cured.

Headaches can be a symptom of fever, acute indigestion, chronic appendicitis, eye strain, food poisoning, constipation, or even a brain tumor. When a physician prescribes a medicine, you can be sure that he will not only relieve the immediate pain, but will also try to cure the cause. Be wise. Depend more on your physician than self-treatments.
