Get MORE Profits From FEWER Acres

APPLY YIELD-INCREASING PHILLIPS 66 AGRICULTURAL AMMONIA

It's just good business to get maximum profits from each acre of land you farm. One of the biggest problems you face as a farmer is the fixed cost of producing a crop. These costs are the same whether you get high or low yields. But you can make more profit and lower your total unit production costs by growing more crops on less acreage. Successful farmers know from experience that proper fertilization and other good farm management practices help produce higher yields and resulting higher profits.

Adequate nitrogen is essential to produce maximum yields of cash crops. Phillips 66 Agricultural Ammonia is 82% nitrogen... more nitrogen per dollar than you can get in any other form of commercial fertilizer available. Plan now to get higher yields of more marketable crops by applying Phillips 66 Agricultural Ammonia.
