WHAT'S DOING

D. A. Short, your Telephone Manager for Heppner

Most folks here in town never think of the telephone company when they see jet fighters tracing vapor trails through the sky. But the fact is that phone people are helping to speed up the nation's air defense by making it work almost automatically. We're building a network of telephone lines that are the nerves of a new system called SAGE. They carry signals from radar outposts to control centers in a flash. There, Air Force men see in an instant what's in the air, and can use SAGE's phone lines to order jets or missiles up without a second's delay. We watch over these lines with care, to make sure they're always working for your safety and security.

Moving soon? Then now's the time to take advantage of an offer that lets you get the extension phone you've always wanted, and save money on the installation charge, too. Here it is: when we install the phone in your new home, we'll also put in an extension (or two or three!) at no extra installation cost. Just call our business office. We'll be glad to take your order today.
