You're steadier... more secure...

...in a road-hugging Wide-Track Pontiac!

Take all its beauty, balance it gracefully on a wider, steadier wheel design and you have a car the likes of which you've never owned. The wheels are five inches farther apart. This widens the stance, but not the car. You're secure at the controls, more comfortable from head to toe. There's a noticeable lack of lean and sway. Narrow track cars fall far short by comparison. Wouldn't this be a good day for you to drive this sweet automobile? The keys are waiting.

THE ONLY CAR WITH WIDE-TRACK WHEELS

Dotted lines show conventional wheel positions. Pontiac's wheels are five inches farther apart. This widens only the stance, not the car itself. Pontiac takes a better grip on the road, hugs tighter on curves and corners. Sway and lean are considerably reduced, ride is smoother, balanced, steadier.
