Visitors at the Franklin Lindstrom home Sunday of last week were Mrs Hugh Bell of Condon and Mr and Mrs Fred Ritchie and daughter, Trudy of Hermiston.

Mr and Mrs C E Brenner and Mrs Verner Troedson spent the weekend in Washington. They spent Friday at Grand Coulee Dam and Soap Lake and Saturday, Armed Forces Day at Moses Lake where the Brenner's son, Lt LeRoy Brenner is stationed in the Air Force. They attended the activities there and visited him.

Landscape Expert Draws Good Crowd

A picture window is a handsome thing, no doubt. It not only brings the outside in, but the inside out! Does Mommy relax with her shoes off? Are Fido's tracks on the floor? Does Daddy let down his suspenders and son drill holes in the floor? Then sit by your picture window and enjoy the outside view. But you won't see as much

of your neighbors, as they will see of you!

This sage comment on picture windows gave evidence of the wit and wisdom of W S Summers, associate professor of landscape architecture at the State College of Washington, Pullman, when he appeared before an interested group in Heppner on Thursday, April 23, at the annex building on the Morrow county fair grounds. This landscaping meeting was sponsored by the county extension staff upon the request of interested extension unit members.

"The problem of landscaping your own home," stated Mr Summers, "divides itself into three parts as I see it. (1) The materials one uses or the design elements; (2) the limitations or considerations that limit one, such as space, time and money; (3) and the actual planning on paper of the complete landscaping around your own home."

With the use of clever and colorful placards, the Washington State professor, brought out design elements to consider in landscaping such as cubic space, land contours, plants, rock, water, and building materials.

Sketches showing how to arrive at the service area, public areas and private area of your farmstead or lot were presented. Climatic influence, views, and maintenance of what you have were also discussed.

The friendly horticulturist closed his lecture in a dramatic way by producing a miniature building plot complete with house, trees, shrubs, walks and a view. The display drew great admiration from the professor's predominantly female audience. Pamphlets entitled "Thirteen Considerations in Landscaping Your Home" and "Plant Materials for Landscaping" were distributed to the group for further study on their own landscaping plans. These bulletins are available at the county agent's office if anyone wishes copies, according to Esther Kirmis and N C Anderson, Morrow county extension agents.

"I feel," said Mr Summer in conclusion, "that each landscap-

Lexington News

The Women's Fellowship group meeting was held at the O W Cutsforth ranch on Tuesday afternoon. A report on the dinner given in May honoring Rev Norman Northrup and his wife was given. Plans for the reception to be given June 14 in honor of Don Campbell was discussed and further plans made. The committee for this Rena and Betty Marquardt. The next meeting will be at the Mae Campbell home. A game of religious names was played with Rena Marquardt winning the prize. IONE School News

The annual spring concert was given at the new school gym-Friday evening, May 15 directed by Arnie Hedman with Karen Lundell accompanist. The program consisted of the high school mixed chorus singing, With A Little Bit of Luck; The Happy Wanderer; and The Little Worm. The 5th and 6th grade beginners band played Silver Buckles; Phil and Dot; Musticians Overture and With Powdered Wigs. The 7th and 8th grade intermediate band played, Honor Band March; Waltz Festival; Ambition Overture and Crime Does Not Pay. Katherine Rea was the narrator. The high school Band, National Emblem March; Magnolia Overture and Big Bowl March; High school mixed chorus sang I Got Shoes, Campfire Blues and You'll Never Walk Alone. High school band played Storm King; Laureate Overture; Blue Tango and Bartlesville Boogie.

Refreshments were served afterwards by the band mothers. High school cheerleaders for next year are Mary Emert, Brenda Townsend and Judy Morgan.

Joe Hausler, 5th and 6th grade teacher and math teacher in high school and grade school principal, has received the National Science foundation grant to attend an 8 weeks summer institute on Mathematics at Reed college this summer. Mrs Hausler and children will stay in Salem with relatives while he is in Portland. Mr Hausler also has a science and math scholarship in Salt Lake City beginning in Sept. After that he will receive his masters degree.

Pre-school children and their mothers visited the 1st grade room Thursday, May 14.

The grasshopper who came to dinner

What a pest! This uninvited guest eats your family's dinner while the food is still growing. Together with other insects, he destroys more than four billion dollars' worth of U. S. crops each year.

To help farmers reduce these losses, Standard's scientists are at work on new and better insecticides. Since 1907, we've developed more than 650 products for every general plant disease and insect problem... from home garden products to agricultural pest controls. Last year our products helped save enough food of all kinds to feed more than a million people.

While this is encouraging progress, the battle never ends. Insects are developing hardier strains

which are more difficult to control. And protecting our food supply is becoming more important, for by 1970 there will be an additional 36 million people in the United States.

That's why one of our most important jobs is creating better ORTHO* pest controls. Through research that helps farmers provide more food for a growing population, the people at Standard are planning ahead to serve you better.

*ORTHO pesticides and fertilizers are made by Standard's wholly-owned subsidiary, California Spray-Chemical Corp., and sold in 75 Free World countries.
