"If We Could Be Twice Young And Twice Old We Could Correct All Our Mistakes"

By Phil Blakney

Unfortunately we are all given only one life and one body to live in. All of us must avoid those mistakes which can cause irreparable harm. Modern mothers have the right idea. New babies are taken to a physician for regular examinations to prevent future troubles.

If all adults would visit their physician at least once every year for a check-up, there would be fewer serious cases of diabetes, glaucoma or cancer.
