Steele, deputy state sealer (outside truck in top view) designed the electrical lift at a saving to the state. This device, now in use on three big trucks, saves the cost of a second man on each truck. Max Burns, assistant weights and measures supervisor, operated the truck on the first run, into Wasco, Umatilla and Wallawa counties. Total capacity is 10,000 pounds of test weights. Truck will test about 1000 scales annually, including vehicle, stock and warehouse installations. It brings state testing fleet in line with increased number of commercial scales in Oregon.

Over The Tee Cup

By Jackie Labhart

Seems as tho' my verbal blast at the weatherman last week "paid off"; at least he doled out some large "change". But with all this heat there are apt to be a few sunstrokes mixed in with the golf strokes, unless our golfers wise up and play in the early morning or evening.

Wednesday Bill and I took the new State Police Sergeant at Arlington Verlin Combs, down to the course and he shot a 37 the first time around (could be his occupation helped him drive straight). Also on the links were Vi and Conley Lanham, Ed Bennett, Lester Doolittle, and Dee and Barbara Gribble.

NOW HEAR THIS: Dee Gribble and Vivian Williams are recent recipients of two beautiful golf trophies from the State Elks Golf Tournament held in Klamath Falls this June. Of the field of women entered Dee shot low gross score and Vivian had low net score. (Needless to say, they are both quite thrilled and the trophies will be on display at the Elks club in the near future.) Ladies day, fourteen foolish females flocked to the fairways some received a little more tan, others a little more burn, but most everyone had an enjoyable morning. Those soaking up 'ol Sol were Ruth Van Winkle, Delores McDowell, Vivian Williams, Kay Robinson, Vi Lanham, Sue Valentine, Dee Gribble, Carma Koenig, Bonnie Mattoon, Marie McQuarrie, Meg Murray, Coramae Ferguson, Helen Shaffitz and myself. Vi had low gross score, Ruth made the least number of putts, Carma had the

most 8's on her score card, and Dee and I tied for the lowest combined score on holes No 2, 4, 6, and 8. OVERHEARD: that Marie really enjoyed her golf game Sunday . . . that Sue shot the same score this ladies day as she did last week, when we only used one club all the way around . . . that between golf and the Little League baseball games, one can certainly use up a day in a hurry . . . that everyone is certainly pleased with the new graveled driveway and parking lot at our course (thanks to Raymond Ferguson) . . . that Hazel and Phil were having a little trouble on the No 4 hole Tuesday evening.

Next ladies day tee off time will be at 8:30. This will be another fun day in the form of an obstacle, obstacle course. It should prove quite interesting so everyone plan to be on time. That's all in the tee cup this week, so until next week, may all your troubles be a hole in one.

Agriculture Census Slated This Fall; Benefits Outlined

Oregon farmers, along with farmers in every other state, will have an opportunity to help set the record straight this fall when the nation's 17th census of agriculture gets under way, reports College extension agricultural economist.

The farm count, scheduled to start in October, will mark the beginning of the most complete inventory of farming, housing and population ever made. It will provide current facts on what appears to have been one of the greatest periods of change in American history.

The last census of Population and housing was taken in 1950, while a partial census of agriculture was taken in 1954. Since then, statisticians have been trying to trace the great changes

taking place. They have worked with incomplete information and are anxious for results of the census. This data will help statisticians "true up" their estimates and will supply information of great interest to everyone concerned with America's growth and stability, Thomas says.

D C Mumford, OSC agricultural economist, stressed the importance of the farm census to each farmer. As farms become larger, the individual farm becomes more important to the total farming picture. This makes it desirable for each farmer to know what others are doing before he makes his own decisions for the future.

Simple records of production, sales and major expenses during the year will be helpful. Census enumerators will ask a variety of questions relating to three general areas: a count of farm resources, a record of farm products produced and sold in 1959, and other farming activities during the year.

Recent guests at the Howard Crowell home were Mr and Mrs Al Winkelman and family of Lexington; Mr and Mrs Wilbur Steagall and daughter, Deanna, of Lexington; Mr and Mrs Robert Crowell and sons of Morgan and Mrs Aldrich of Ione. Visitors there last week were Mr and Mrs Malcolm Riehelderfer and children, of The Dalles.

Mr and Mrs Leonard Carlson of Portland visited relatives here last week. They were accompanied by a cousin, Mrs Esther Johnson of Los Angeles.

Guests at the Milton Morgan home last week were, Mrs Margaret Downing and Mr and Mrs Arthur Cooper of Hood River.

Mrs Olive Engleman is a patient in the Pioneer Memorial hospital.
