The best-known secret in brewing

Since before the turn of the century, brewing authorities in Europe and this country have agreed that a common link exists between the world's great beers. Whether brewed in Bavaria, the British Isles or America, beers with world-wide reputations for quality always have been found to possess brewing waters of exceptional character and unchanging excellence. These rare waters are capable of extracting from select hops and grains the most delicate flavors and aromas. One such water flows cold and clear from Olympia's own artesian wells. It is this rare, naturally perfect brewing water that makes the refreshing difference in light Olympia Beer.
