"Worry Profoundly Affects The Health"

Research scientists are learning that worry actually can make people sick even though there may be nothing wrong with their health. Worrying about a possible sickness and doing nothing else to help overcome it is unwise.

Why worry about your health? A physician's life is dedicated to keeping you well. Visit your physician anytime you feel sick and let him examine you. He will soon find out if there is anything to worry about and will prescribe any medicines needed to correct any present or developing trouble.
