The car craftsmen who developed Wide-Track Wheels, the innovation that brought a new standard of roadability to the American passenger car, present another fresh original for 1960!

With clean, crisp lines they've composed a delightful rightness of form with unity and rhythm.

Into the proved principle of Wide-Track (wheels farther apart for a steadier stance) they've engineered an ingeniously improved suspension system. This combination of a firm foundation and supple suspension gives you flawless control, more skill in the fine art of driving, smooth stability, bump-yielding softness.

The power plant is typically Pontiac. A wide range of restless, ground-gaining power packages to choose from. All are husky V-8's, ranging from the frugal 425E economy engine that prefers regular grade gasoline to the fiery Tempest 425.

Haven't you been an admiring spectator of Pontiacs long enough? Isn't this your year to become a participant in Pontiac pleasure, to move up to Pontiac ownership, where the enjoyment is the fullest, where the point of view is the freshest?

Wide-Track Wheels give you swayless stability, solid comfort. You maneuver with skillful sureness, accurate control. It's the sweetest, most precise, most rewarding driving you've ever felt.
