School Budget and Building Levy Should be Approved

Next Tuesday all registered voters should get to the polls to vote on the county school budget and the special building levy and it is our recommendation that both be approved.

During recent months there have been numerous budget and advisory committee hearings on both measures, and all sides should have had ample opportunity to voice their views and try to settle their differences. There seems to be very little objection to the budget, and we believe that probably more work has gone into this year's operating budget than into any budget in many years. There are no "extras" in it anywhere, that we can see—just necessary funds to operate good county schools.

The special building levy, \$130,000 a year for 4 years, will not take care of all the building needs in the county for the next four years, by any means, but it is a good start. And, the way it has been tentatively planned by the school board, the building money will be used first

where it is first needed. That doesn't mean, however, that all communities in the county aren't being considered. Heppner was placed first on the construction list because it will face the gravest housing problem next year. Other schools will be taken care of as their problems arise.

The special building levy is a good start on a county building program. It is not the whole answer, but it is the best that can be done under the circumstances. And, it will mean we will be doing as much as possible of our school building program on a Pay-As-We-Go basis—there is no cheaper way to do it.

A delay in starting our county school building program will only mean more expense in dollars and cents. Even more important, is the fact that without some new classrooms, a lot of students next year will either have to get their education on a double-shift basis or again hold their classes in church basements. Nobody can say that that's good education.

From The County Agent's Office

By N C ANDERSON

With the last few days warm and sunny we have had numerous calls of ranchers wishing to check for advice on spraying cereals for annual weed control. Some calls asked whether butyl or isopropyl ester was the best 2,4-D, some wanted to know if late emerging seedlings which were not in the three to five tiller stage would be hurt too much, what the recommended dosage was for various weeds and how to calibrate sprayers. First, on the question of comparison of various types of 2,4-D sprays we recommended that the type be selected which fits best the rancher's pocketbook, generally speaking one type is as effective as another, pound for pound of acid. Six pound per gallon butyl at \$5.00 a gallon costs 83 cents per pound of acid while 3.34 pound per gallon isopropyl ester

at \$3.00 costs 90 cents a pound. It is an easy matter to calculate cost per pound of acid and buy accordingly.

If the weather stays as it is Monday, as we are writing this, smaller amounts of 2,4-D will be needed for an effective control. Cold, slow growing weather takes more acid to kill. If most of the grain has reached the 3 to 5 tiller stage it is advisable to spray the field even though there might be some seedling grain; the damage done would be slighter than the good accomplished by killing weeds in the rosette stage while they are growing rapidly. Grain in a thrifty condition and the weather is in the 50's, 60's and 70's will be very slightly affected by the 2,4-D. Smaller amounts of 2,4-D will be necessary under these ideal conditions also. One-half to one pound of actual acid per acre will control broad leaf weeds. The smaller amount of acid will take care of mustards, filarees and will be easy to kill weeds while the one pound rate should take care of tar weed, when in the present stage. Amounts of water to be used per acre and spraying pressures will depend on several conditions. Airplane applicators generally use considerably less water per acre than ground sprayers should attempt to get by with. Enough water should be used to get adequate coverage with pressures of 35 to 45 pounds. Higher pressures break up particles causing considerable drift especially if there are winds. Rates of application will vary with the speed travelled and the spray nozzle used. A good application to strive for is 6 to 8 gallons per acre with ground equipment. We hope that the weather continues as it was on Monday for the remainder of this week. If it does there should be a lot of

spraying completed by Saturday night with excellent results.

Kenneth Smouse, Ione and Kenneth Peck, Lexington paid the top prices for boars at the first annual boar sale held at the swine evaluation station at Hermiston on Saturday. Kenny Smouse paid \$275.00 for a Yorkshire boar which made an average daily gain of 1.99 pounds with a feed efficiency of 321 pounds of feed per 100 pounds gain. The live back fat probe of the boar was lightly over one inch which is considered very good. The Poland China boar purchased by Kenneth Peck, Lexington for \$200.00 had an average daily gain of 1.81 pounds, a feed efficiency of 391 pounds grain per 100 pounds gain and an outstanding back fat probe of .73 inches. Both of these boars were consigned to the test station and sale by Earl Simantel, Cornellus, Oregon.

Kenneth Smouse's boar was from a litter of 16 and slaughter data on the market hogs which were fed in a pen on test with the board had carcass lengths of 31 inches, loin eye areas of almost 4 inches and averaged over 56% lean cuts from the carcass. The Poland China boar purchased by Kenny Peck was from a litter of 10, with market hogs in this pen averaging a carcass length of 28 inches, loin eye area 4.81 and 56.5% lean cuts. These two top selling boars should add much to the two outstanding herds in Morrow county that they are going into.

Average for the 21 boars sold at the sale was \$120. Buyers from throughout the entire state were on hand with a few from the state of Washington. Quality was excellent and swine breeders paid for the performance record which met strict require-

THIRTY YEARS AGO

From the files of the Gazette-Times
April 10, 1930

William R Poulson was elected president, Mrs Paul Gemmill, vice president, Mrs Clara Beam, secretary and Mrs J O Hager, treasurer, of the Parent-Teacher association at a meeting of that organization Tuesday afternoon in the Heppner high school assembly room.

Clifford Yarnell of the seventh grade at Ione won third place in the county spelling contest, held Saturday morning at Heppner.

Mr and Mrs F L White of San Francisco, Calif arrived in Heppner Sunday after motoring up to visit with Mr and Mrs F B Nickerson.

Jesse J Wells, Morrow county assessor, went to Boardman Monday expecting to be there several days assessing property in that district.

Constitution and by-laws for reorganization of the Heppner Commercial club were presented by S E Notson, chairman of the committee in charge, at the Lions meeting Monday, noon.

ments to be eligible to be sold through this sale. Not only did the Smouse's pay a good price for their quality boar but the prices received for boars consigned by them run high. Two Yorkshires sold averaged \$145. While two Palouse averaged \$130. These were consigned by Kenneth Lynn and Kenneth J Smouse. The average for the 6 Palouse boars sold was \$82.50; for the six Yorkshire boars \$173.00; two Hamp boars brought an average of \$154.50; three Poland Chinas \$128.20; two Landrace \$67.50; a Chester White \$40; and a Berkshire \$120.

A large crowd attended the sale and dedication of the swine evaluation station. Paulen Kaseberg, Wasco, chairman of the Oregon Wheat Commission who built the swine testing facilities presented them to the Oregon state experiment station. Dean of agriculture and director of the experiment station, F E Price accepted the facilities while Dr J C Miller, head of the dairy and animal husbandry department, Oregon State College complimented the Wheat Commission on their interest in improving the swine industry of Oregon. Dr Dave England of the animal husbandry department and Dean Frischknecht, extension animal husbandman, both of Oregon State College participated in the program and sale.

A lot of grass and alfalfa has been or will be seeded this spring, much of it in soil bank, others in improved pastures and hay seeding. The Heppner Soil Conservation District's grass legume drill has been busy the past week and has a good schedule ahead of it. On Monday, I assisted Harold Peck in getting started with a 108 acre seeding on his home ranch which is going into the soil bank. It, like many ranches which have been

put into the soil bank, is a little steep, fields are small and the problem of getting machinery to them is a problem. Harold has disced his stubble for seedbed preparation, killing volunteer and weeds and keeping the moisture right on top. He is seeding between 4 and 5 pounds of crested wheatgrass with a pound or two of Ladak alfalfa. With the good seedbed, moisture conditions and seeding carried out this land should be in much better condition after the soil bank contract expires than when into the bank. Harold has had some wonderful results with grass seedings on this ranch and bottoms on Rhea Creek. A five year old seeding of Nomad alfalfa and intermediate wheatgrass adjacent to one of his soil bank fields has increased forage production several times over the native range. A visit made to the Ebb Hughes ranch late last week found a grass alfalfa demonstration planting made there seven years ago this month looking better than ever before. Growth was considerably ahead of alfalfa and grass on the bottom land and Ebb is anticipating a lot of pasture from this abandoned cropland again this year. As we drive around the county the many fields of grass and alfalfa which have been seeded as parts of the five grazing alfalfa demonstrations and others that came as result of these look good and present striking examples of what reseeded range will produce in comparison to its native state.

CHURCH ANNOUNCEMENTS

ST WILLIAMS CHURCH
Ione
Rev Raymond Beard
Sunday Mass, 9:15 a m.

ASSEMBLY OF GOD CHURCH
Homer Wolfington, pastor
Sunday school, 9:45 a m.
Morning worship, 11:00 a m.
Evening service 7:00 p m.
Tuesday evening service, 7:45

IONE COMMUNITY CHURCH
Rev Rod MacKenzie, pastor
Church school at 9:45 A M.
Morning worship at 11 A M.
Junior High Pilgrim Fellowship at 3 P M.
Senior High Pilgrim Fellowship at 7 P M. A film strip will be shown on the Meaning of Lent. Anyone welcome.
Choir practice Monday at 8 P M.

Maranatha club meeting at the home of Mrs Earl McKinney near Hermiston with luncheon at noon followed by a meeting at the home of Mrs Lloyd Howton in Hermiston at 2 P M. Wednesday, April 13.

Maudy Thursday services and reception for new members at the church, April 14 at 8 P M.

CHURCH OF THE NAZARENE
Robert Whybrew, pastor
Sunday school 10 a m.
Worship 11 a m.
Nazarene young peoples society 7:00 p m.
Evening service, 7:30 p m.
Meeting in Seventh Day Adventist church. Everyone welcome.

LEXINGTON CHURCH OF CHRIST
Walter Smith, pastor
Sunday school, 10:00 a m.
Worship 11:00 a m.

HOPE LUTHERAN CHURCH
Alfalfa Street
Worship services, 11:00 a m.
Sunday school, 9:45 a m.

THE ANGRY HILLS of Athens and Greece authentically filmed in a dramatic bombshell-plus-Second Action Feature, Star Theater, Thursday-Friday-Saturday.

WANTED
Homesite on school bus route, within 10 miles of Heppner.
Ray Smith, Printer Gazette-Times. Phone 6-5330.

CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS
American Legion hall
Priesthood meeting, 8:30 a m.
Sunday school at 10:30.
Sacrament service will begin at 11:30 a m.

Notice of Candidacy

I hereby announce my candidacy to succeed myself for the office of County Clerk of Morrow County subject to the will of the Democratic voters of Morrow County at the Primary election.

Sadie Parrish

Notice of Candidacy

I hereby announce my candidacy for the office of clerk of Morrow County subject to the will of the Democratic voters of Morrow County at the Primary election, May 20, 1960.

Thomas J. Wells
2-c (Pd. Adv.)

Notice of Candidacy

I hereby announce my candidacy to succeed myself for the office of county commissioner subject to the will of the Republican voters of Morrow County at the Primary election May 20, 1960.

Russell Miller
1-(Pd Adv.)

Notice of Candidacy

I wish to announce that I will be a candidate to succeed myself for the office of County Treasurer, subject to the will of the Republican voters of Morrow County at the May 20th Primary election.

Sylvia McDaniel
50-Pd. Adv.

Notice of Candidacy

I hereby announce my candidacy to succeed myself for the office of Sheriff of Morrow County subject to the will of the Republican voters of Morrow County at the Primary election, May 20, 1960.

"...the most significant engineering advance" of 1960
... Motor Trend Magazine

Corvair named "CAR OF THE YEAR"

"Four-wheel independent suspension totally unlike any other U.S.-built car" . . . "air-cooled aluminum engine . . . not dependent on the properties of a liquid coolant" . . . a rear-mounted transaxle "allowing a flatter floor and a lower roofline. . . ." These are some of the praises heaped upon Corvair by the editors of Motor Trend—the world's largest general automotive magazine—in announcing their coveted Car-of-the-Year award. Other cars didn't even come close. The Motor Trend experts, who evaluated every make in the country, were unanimous in their decision, published in the April issue. But, unless you have personally driven a Corvair, you can't appreciate what this engineering achievement really means in combining compact car economy and agility with big for economical transportation car ride, room and sure-footedness. Drop down to your dealer's, take a trial drive and then judge the Corvair BY CHEVROLET
