WHAT'S DOING

You haven't seen this new drive-up phone in Heppner but it is something new that is being tested around the Pacific West to see if folks find it as handy and convenient as we think it is. The idea is to provide curbside phone service so you can call without getting out of your car—a real convenience. It's lighted so you can use it at night as well as during the day. We think you'll find it a faster and easier way to telephone when you're in your car and want to make a call.

There's gold in your telephone. Not very much, to be sure. Gold is used because it just won't rust. And it's put in spots such as dial switch points to insure long, trouble-free service. I suppose you're wondering how much the gold in your phone is worth. The folks at

Western Electric who make our phones say there's less than a penny's worth in each. That's hardly enough to tip these scales or go prospecting for, but plenty to help keep your phone dependable.

September is schooltime, and a lot of young people will be leaving home for college or boarding school. Here's one good way to stay in touch with them—by telephone. Lots of folks set a regular time for calling and keeping up on the news. And more often than not, this time is on a Sunday or on weekdays

after 6:00 p.m. when station-to-station rates are lower. The pleasure is big and the cost is small—a lot smaller than you think—when you keep in touch by telephone.
