**HOW TO  
MAKE YOUR  
HOUSEHOLD  
DOLLAR  
GO FARTHER!**

1. Heating a house without weather stripping or insulation is like trying to carry water in a leaky bucket. Weather stripping and insulation keep heat inside where it does you some good.

2. Save heat by pulling down window shades, or drawing drapes, at night because heat passes easily through window glass.

3. Plan your clothes drying so that you can do a full load each time in your electric dryer.

4. Clean the lint from your dryer often. Lint holds water and makes clothes harder to dry.

These are just a few of the ways you get your biggest value from dependable PF&L electric service. Use it often, use it efficiently. Live better electrically!
