## Reddy Kilowatt's Helpful Hints

### HOW TO MAKE YOUR HOUSEHOLD DOLLAR GO FARTHER!

- Heating a house without weather stripping or insulation is like trying to carry water in a leaky bucket. Weather stripping and insulation keep heat inside where it does you some good.
  - Save heat by pulling down window shades or drawing drapes at night because heat passes easily through window glass.
  - Plan your clothes drying so that you can do a full load each time in your electric dryer.
  - Clean the lint from your dryer often. Lint holds water and makes clothes harder to dry.
- These are just a few of the ways you get your biggest value from dependable PP&L electric service. Use it often, use it efficiently. Live better electrically!
