

### Oregon Anglers Poised For Opener

Oregon anglers, some 350,000 strong, will take to the outdoors this coming week end, April 22, for this date marks the opening of the general state-wide trout season. Unless this mass of anglers undergoes a complete reversal of opening season form, practically every lake and stream in the state opening on that date will get a good working over before the week end is done.

Many anglers will head directly for pre-picked "hot spots" and will be whipping the water with bait or fly at the crack of daylight. For those anglers who are somewhat in doubt, here's a look-see at a few likely producers for the big week end show. None are foolproof guarantees, but through the years most of these waters have been consistent early season producers.

Streams in the John Day country may be out of shape, but barring such conditions should produce fair to good catches of rainbow. Rowe Creek reservoir, Hubble and Magone lakes should be fair, along with Strawberry, Olive, and Slide lakes if they can be reached. Small streams in the John Day

basin should be the best yet. Success in the Umatilla should be fair to good. McKay reservoir may be a real hot spot with trout now running to good size. Barring heavy run-off, Eagle creek, Minam, Imnaha, Wenaha, Grande Ronde, and Willows rivers are expected good. Morgan lake should continue with its excellent production of last year. Willows lake should be fair for rainbows and lake trout to 20 inches.

Anglers in the know will search out the small high streams and creeks for the opening. Phenomenal trout are produced in this country in streams that anglers can jump across. Fish the high meadows, especially for best results and bigger fish where meadow grass, wild sweet clover, and willow overhang the banks.

Anglers are urged to look over the angling synopsis for bag limits and waters which will open on April 22. All coastal lakes will open on that day, but coast streams remain closed. High mountain lakes within national forest boundaries in the Cascades will also remain closed until May 27. There are some in the high lake country so take a good look before barging into the Cascade national forest country.

### Direct Distance Dialing For Area In 1962

Direct Distance Dialing (DDD) from telephones in Heppner, Ione and Lexington is planned for 1962.

At approximately the same time DDD is introduced, telephone numbers will change to the nationwide All Number Calling (ANC) system.

This was announced last week by W. R. Brown, district commercial manager for Pacific Telephone. Tentative date for the start of DDD and ANC in Heppner, Ione and Lexington is late spring of next year.

"DDD will open the way for telephone users in these communities to dial their own long distance calls to more than 54 million of the 74 million telephones throughout the United States as well as millions more in Canada," Brown declared.

Bringing DDD to the Heppner area will require the modification and expansion of long distance facilities in all three communities.

Arlington, Athena, Echo, Hermiston, Pendleton, Milton-Freewater, Stanfield, Umatilla and Westor will also begin DDD next spring. Overall cost of introducing DDD for these towns, including the Heppner area, is estimated at \$750,000.

All number calling is a phone numbering plan that uses seven numerals rather than a combination of letters and numerals. Instead of adding letters to the phone numbers, then making a second change later, the prefixes will be changed completely next year.

Typical phone numbers now and then: Heppner, 6-5580 will become 676-5580; Ione, 8-7480 becomes 422-7480; and Lexington, 3-8814 will appear as 989-8114.

Except for the prefix change, phone numbers will remain as they are in all three communities.

The nine other communities will also be switched to ANC before DDD is introduced.

ANC has become a necessity in the United States for several reasons. The basic one is population growth. The phone companies find that about 50 percent more phone numbers can be used by the ANC system than are available on the dial using the two-letter five-number combination.

A second factor is the potential of worldwide dialing of calls by customers. Almost all nations use the same Arabic numerals that we do. Alphabets and letters are varied in many ways. By sticking to numerals only, the differences and problems found in letters are eliminated.
