This family is the victim of hot weather stalling—one of three infuriating troubles that can strike your car on sizzling days. Super Shell's Hot Weather Blend fights all three.

HAPPY JULY 4th?

Fight hot weather stalls with Super Shell's **Hot Weather Blend**. Famous 9-ingredient formula now adjusted for top performance when highways sizzle.

You can get Super Shell's **Hot Weather Blend** at any Shell station on your route this weekend. Read how it just might save you a lot of trouble.

ENGINES, like people, can suffer from heat prostration. Especially in the kind of hot and heavy traffic you may face during the weekend ahead.

Here are three infuriating troubles that are caused by excessive heat—and what Super Shell's **Hot Weather Blend** does to fight them.

How Super Shell fights hot weather stalls

If your engine sputters and dies on a hot day, it may have an ailment called **vapor lock**.

Hot weather can make certain gasolines start to boil right in the fuel line. They literally bubble. Vapor lock takes place when the bubbles choke off the fuel supply.

Shell scientists attack **vapor lock** by revising Super Shell's nine-ingredient formula in summer.

They reduce its volatility. This produces a **Hot Weather Blend** of Super Shell that's not likely to boil in your fuel line. It cuts the chances of hot weather stalls to a minimum.

How Super Shell fights hard starting

Here's what can happen when you try to re-start your car after a hot drive.

With the fan stopped and the cooling system idle, intense heat under the hood can actually make gasoline **percolate** in some carburetors. Just like coffee in a pot. The gasoline spills over, floods

the engine—and makes it hard to start.

Super Shell's **Hot Weather Blend** is formulated to stand high temperatures without percolating. You get quick starts even after a long, hard, hot drive.

How Super Shell fights rough idling

The same trouble that causes summer starting difficulties can give your car the shakes every time you stop for a traffic light.

Super Shell's **Hot Weather Blend** attacks both problems the same way. Its formula is adjusted so that it's in no hurry to boil and bubble. Result: smooth idling in hot weather.

Shell trouble-shooter

Your Shell dealer will be glad to prepare your car for summer driving. His trouble-shooting may save you hours of delay on the road.

And ask him to fill your tank with Super Shell's **Hot Weather Blend**. Then you will really be set for top performance.

Super Shell's 9 ingredients for top performance

- #1 is TCP[®]—for power, mileage, and longer plug life.
- #2 is "cat-cracked" gasoline—for power.
- #3 is anti-knock mix—for knock resistance.
- #4 is Alkylate to control "high-speed knock."
- #5 is Butane—for quick starts.
- #6 is Pentane mix—for fast warm-ups.
- #7 is an "anti-icer." (Added when cold weather sets in.)
- #8 is gum preventive—for clean carburetors.
- #9 is Platformate for extra mileage.

*Trademark for Shell's unique gasoline additive. Gasoline containing TCP is covered by U.S. Patent 2,986,212.
