THIS IS YOUR HOSPITAL

By W. L. O'HARRA

Up until the first of July the hospital has been pretty busy this year. However, harvest time and vacation time is here, and the patient load has slackened off a little.

Two weeks ago we announced a room rate increase and a little discussion about this is probably in order. On my desk is a group of clippings from various newspapers throughout the state announcing their room rate increases, and I notice that our rates are still lower than all but one hospital and they average

the same as this one. Our rates now are the same or lower than many other hospital rates were before they raised.

The reason for the general raise both here and throughout the state is, of course, general rising costs. In our article announcing the raise, we attributed the nurses' salary increase as a reason for increasing hospital rates. This salary increase was only part of our overall rising costs. This hospital does not negotiate directly with the Oregon Nurses Association, but when they recommend a certain salary and the majority of the hospitals start paying that salary, we adopt the same salary schedule.

Actually, for the past several years we have paid our nurses more than the minimum recommended salary in order to attract nurses to this locality.

We have a rather large problem that has come up in the last few weeks and possibly a little history and discussion of it will evoke some help from readers of this column.

In 1949 a number of people donated enough money to buy an ambulance. Various organizations operated it for a time and then it was turned over to the County Court. It was then operated by the hospital until 1960 when it was sold to a private

individual to operate. On July 1 of this year it was turned back to the county. In addition to the fact that it is a 1949 automobile that was wrecked on the trip from the factory and has had several mechanical difficulties, some of them originating from the wreck, the legislature at the last session passed a bill regulating ambulances. This new law, which is administered by the Occupational Health Section of the State Board of Health, imposes many obligations on the operators of an ambulance. These obligations are too lengthy to enumerate here. They regulate and set up standards for the driver, the ambulance, the equipment in the ambulance, and the operators of the ambulance. Basically what the law does is require you to run an excellent ambulance service with no corner cutting.

Now to get to our local problem: how to operate the ambulance to give the people of this community a good ambulance service. The hospital can't do it alone, we do not have the personnel. In the past, one person at the hospital and a very few volunteers have carried the load for the whole county. How about forming a Volunteer Ambulance Corps? We are open to anyone's suggestion. Give us a call and express your idea. Drivers and attendants are paid so it isn't a strictly charity job.

To volunteer as a driver or attendant—call 6-9133 and leave your name and telephone number.

Charges are Dropped On Felony Complaint

John Henry Yearwood, 29, Portland, was released from the county jail and charges of threatening to commit a felony against him were dropped July 24.

Earlier Beverly Nella, 22, Albany, had signed a complaint stating that Yearwood had tied her to a bed in his hotel room and told her he would kill her on his return. She managed to escape, went to the police and swore out a warrant for his arrest.

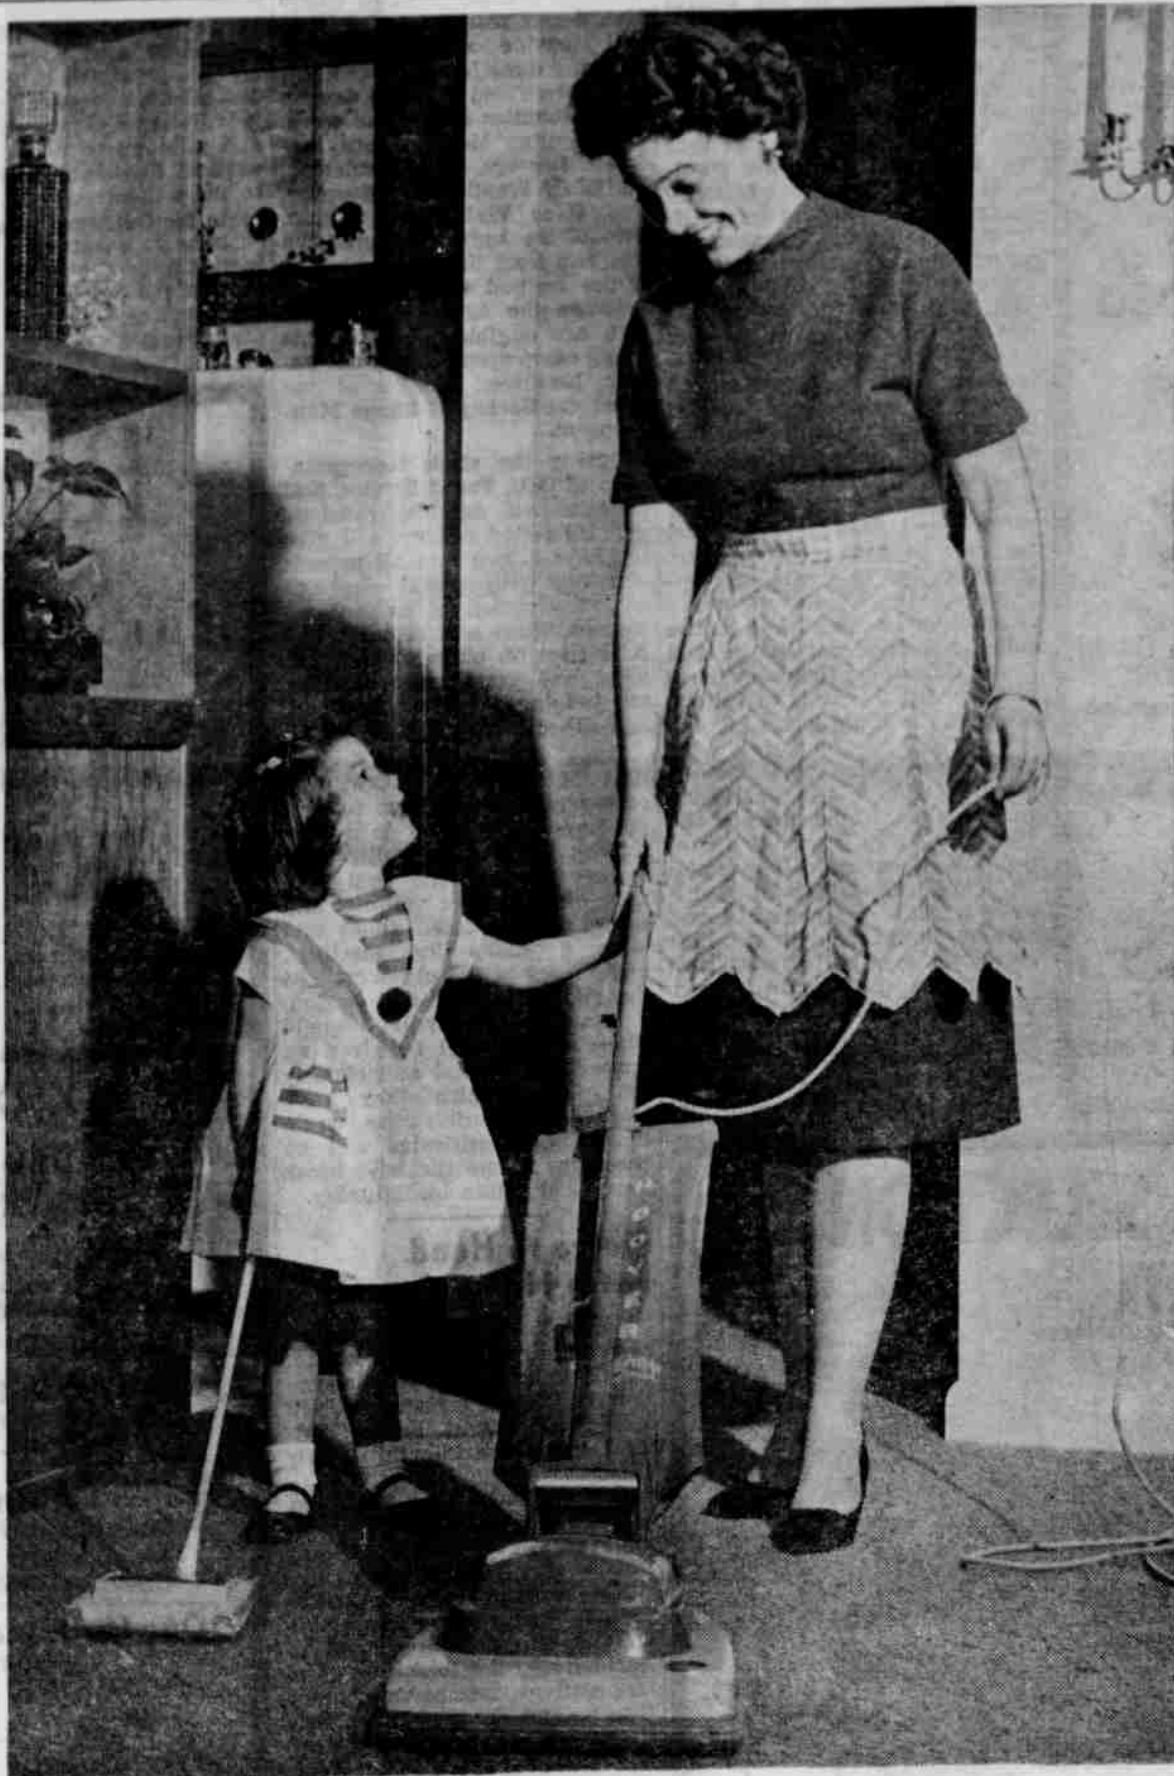

Charges were dropped when the plaintiff changed her story and said she would refuse to testify.

Mumps Here Continue To Afflict Residents

Mumps are not confined to the young, but also are attacking the "young in heart" according to recent reports.

Mrs. Max Buschke, Heppner, office nurse for Dr. H. S. Huber, returned to work July 24 after a bout with the swollen jaw. She became ill July 16 just in time to keep her home from church, and spent the full week until the 23rd victim of the disease.

Dewey Britt, Heppner, recovered from an attack of the mumps about 4 weeks ago, and his wife had them last week.
