Chamber to Ask Road to Project; P. I. Booth Talked

A resolution asking the county court to build a road to connect present county roads to the south end of the bombing range, proposed site of the Boeing Airplane Co. missile base, was authorized at the Monday meeting of the Heppner-Morrow County Chamber of Commerce. A motion calling for such a resolution passed without any members dissenting.

Need was mentioned for a road at this location to provide an outlet for the impending Boeing development to the businesses and recreational facilities to the south end of the county. It was also pointed out that in the event that evacuation of the missile site were needed sometime in the future, the road would give a route to the inland area.

In other business, Chamber president Mike Whitesmith appointed Bill Collins and Ed Dick to a committee to consider matters that should be brought to the attention of the state interim committee on small business. A recent letter from State Senator Richard Groener of Milwaukie, chairman of the interim committee, asked for suggestions from the chamber on behalf of small business.

The group also discussed items that might be included in a booth that the chamber will sponsor at the Pacific International Livestock Exposition this fall. Jim Farley and Wes Sherman are co-chairmen in charge of arrangements.

Plans for the county picnic Saturday following the rodeo parade have been completed, it was announced at the meeting.

Chairman Roice Fulleton called for volunteers for ticket takers at the rodeo and received a good response from those attending.

Frank Turner passed along a suggestion from Mrs. Nellie Anderson asking that the Chamber consider plans for planting trees along highways coming into Heppner. It was brought out that a previous attempt a number of years ago to plant trees ran into a number of difficulties. Suggestion was made that a committee be appointed to consider all possibilities of beautifying entrances to town, and President Whitesmith said that he would consider such a committee.

Mr. and Mrs. Bud Peck and family is spending some time at the coast vacationing. They left Thursday and will return by opening of school. Their vacation is centering in the Newport area. Bud is manager of Ford Tire Service here.

Ione Kindergarten Classes Are Delayed

Ione kindergarten class will be delayed in starting this year, due to lack of sufficient funds for providing necessary equipment and supplies.

Parents of pre-school children hope that through fund raising campaigns during the next three or four months, instruction can be started the first part of February, with the second semester of school. The group hopes that by that time space will be available in the old school building, after a move is made to the new building.
