## Buick's New Electra 225 For 1962

The clean, uncluttered styling of Buick for 1962 is exemplified in the Electra 225 series with its sporty new roofline and its tailored rear decklid with the wind-split down the center. The long, sweeping lines of the front and rear fenders make the car look bigger without increasing its size. The new roofline with its wide, sloping rear pillars identify the Electra 225 series, one of the most luxurious cars in the fine car field. Passenger comfort has been improved for 1962 by the almost complete elimination of the transmission hump in the floor of the front passenger compartment. The Electra 225 is powered by a 401 cubic inch V-8 engine with four-barrel carburetor, coupled with Buick's smooth Turbine Drive transmission.

## "Living's more fun when you use electricity in as many ways as we do"

Here's what PP&L customer Mrs. William A. Gilmore says about electric living...

"It's wonderful to be able to depend on electricity for so many different things. We keep our electric appliances busy doing everything from laundry and dishwashing to freezing ice cream. My whole family appreciates the big value we get with electric service."

Like thousands of other Pacific Power & Light customers, Mrs. Gilmore and her family live better because they make generous and effective use of modern electric service.

How about you—are you making full use of Reddy Kilowatt's helpful service?

In the typical U.S. home Reddy works 327 hours per month.

In the average Pacific Powerland home Reddy works 717 hours per month.

In Mrs. Gilmore's home Reddy works 1,580 hours per month.
