

## Barley Diversion Benefits Told

With the sign-up for diverting wheat and barley underway, Paul W. Jones, chairman, Morrow County Agricultural Stabilization and Conservation committee, lists benefits of "Maximum" barley diversion.

Maximum diversion of acreage under the 1962 feed grain program for barley applies for diverting more than the minimum acreage into a conservation practice under the program.

The minimum diversion is 20 percent of the farm's barley base acreage, for which the payment will be on half the farm's normal yield, at the county support price. For up to an additional 20 percent diversion, the chairman explained, the payment under the program will be the county support price on 60 percent of the normal yield.

Besides the higher rate of payment, and the improvement of the farm's future productive capacity through carrying out approved conservation practices on the diverted acres, the diversion payments will serve as a form of income protection, the chairman declared. And the more land covered by the program, the greater the protection against possible crop loss due to unfavorable weather or other production hazards.

If a farmer uses borrowed money for crop operations, he will also save both principal and interest by having to borrow less than would have been required if he had planted and harvested grain on his entire allotment.

Eligibility for price support on the farm's "normal" yield of the 1962 barley acreage will depend on participation in the 1962 barley feed grain program and on meeting at least the minimum requirements of the program.

The local sign-up under the 1962 winter barley feed grain program started on October 12, 1961. It will continue through December 1. A sign-up for spring

## Tryco Adds Lines To Offer Better Service to Farms

In an effort to offer complete service as an area farm store, Tryco (Tri-County Equipment Company) in Heppner has taken on several new lines, Dave Townsend, manager, announces.

Among the most recent additions are Behlen steel buildings and Red Jacket pumps and irrigation systems.

The Behlen line includes the "Curvet" farm building, designed for grain and hay storage, machinery-tool shelter, calving barn, milking parlor, potato warehouse, repair shop or loafing barn. Also in the line are flat top steel buildings, Lok-Frame buildings, grain storage tanks that offer new strength and ease of installation through a "waffle-type" construction and steel gates.

The local firm has all types of Red Jacket pumps and irrigation systems and Bob Jennings, a pump expert of the Pendleton area, is available to work with farmers and others through Tryco on estimates of their needs.

Townsend said other new lines are being added to make the firm a complete farm store. The company is John Deere dealer and services all types and makes of farm equipment.

In keeping with this effort to expand service, Tryco has a representative now in the field in addition to the regular sales and service staff.

barley will be held early next year in conjunction with the 1962 program sign-up for corn and grain sorghum.

## Condon Tips Heppner; Burns There Next

Condon high school's football team walked off with a 19-0 victory over Heppner on the Condon field Friday afternoon, but the score didn't tell the whole story. It was an even game until near the end, and the Mustangs, except for a few reversals, might have come off with the victory.

A 35-yard gallop by Herbison of Condon started the scoring in the first quarter, and his team mate, Massey, ran the extra point. The two teams traded punts after that. Finally, Heppner took the ball, generated a drive and marched 80 yards to score, but the touchdown was called back for an offside penalty.

They were unable to hit paydirt again, and the half ended 7-0 for the Gilliam county team.

Offenses of both clubs were bogged down in the third quarter and neither team could tally.

In the final stanza, Heppner fumbled and Condon recovered. Herbison took it on the first play, skirted end and ran 40 yards to the end zone. The kick try for point was wide.

With time running out on them, the Heppner eleven took to the air and were gaining ground. But with 30 seconds to play, a pass was intercepted and ran back for Condon's third touchdown.

"We had tough breaks in the game," Coach Jim Sutherland said after the battle. "It was really a better game than the score indicated. We were in the ball game until the end."

The Mustangs entered the contest with several players injured or ill, but the sophomores came through in good shape to

fill the gaps left by the upperclassmen.

Last road trip of the season will be to Burns for a game Saturday at 2 p. m. The coach expects the team to be in top shape.

The season will be completed on the home field Friday night, October 27, when the Mustangs face Sherman county (Moro) in a league game.

## Mustang Jayvees And John Day Battle to Tie

Heppner's jayvee football team completed its season Tuesday afternoon with a 7-7 tie with the Grant Union (John Day) Jayvees on the rodeo field here.

The deadlock gave the young Mustangs a season's record of three wins, one tie and one loss. Six freshmen players will finish the year on the varsity squad.

The Mustang eleven had trouble on offense in the Tuesday contest, lacking the drive that has been so strong in previous games. They made nine fumbles and only recovered one. Passes also went awry, and they had seven intercepted.

John Day opened scoring Tuesday in the second quarter with a touchdown on a quick opener from two yards out. They ran the extra point.

Heppner knotted the score with just 30 seconds left in the first half. David Hanna intercepted a pass and ran it back to score. He also ran the extra point.

Coach Bob Cantonwine was far from pleased with his team's performance in this game, but he did not show the same displeasure with the season's record.

ONE REASON the Ione Cardinals won the league 8-man football championship this year is the manner in which the reserves came through. These members of the second unit became stronger as the year progressed and gave outstanding service to the team. Front row (from left) are: Bruce Rigby, Marvin Padberg, Garry Morgan, Joe Halvorson, Tom Pointer and Tom Heimblinger. At rear are Lee Hams, Jim Martin and Bob DeSpain. (G-T Photo)

## Cardinals Topple St. Joseph, 19-12

(Also story page 1)

It was a battle of the giants in the Morrow-Umatilla 8-man football league when Ione and St. Joseph clashed at Pendleton Friday afternoon, but the Cardinals, state champs of 1960, came through with a hard-fought 19-12 victory.

Coach Glenn Biehl of Ione, although happy to have won, had words of praise for the losers, too.

"They tackled and blocked the hardest of any team we have faced," he said. "My boys could have quit because they were not used to this, but they didn't."

Ione got on the scoreboard first when the Cards' brilliant quarterback, Wayne Hams, shot a 15-yard pass to Ken Klingler. Going 55 yards from the point of the catch, Klingler scored on the way that covered 70 yards in all. This was in the second quarter. The two squads had battled to a 0-0 draw in the first quarter while hundreds of frenzied fans cheered their respective favorites.

Ione tried to kick the conversion but failed when it went wide.

Down six points, St. Jo hammered right back. Joe Knight tied the score when he went around end for 16 yards and a touchdown, also in the second quarter. The Pendleton team failed to make the extra point, and halftime stood 6-6.

The Hams-Klingler combina-

tion paid off for Ione again in the third-quarter. Klingler caught a 10-yard pass from the quarterback and ran 20 yards to score. This time the try for point was good, a pass from Hams to Ron Crabtree.

St. Jo, desperately trying for the league championship and the state playoff berth, bounced back again in the fourth quarter. They moved 70 yards on a march, and their fine quarterback, Dan Jordan, climaxed the drive with a plunge to paydirt from the one foot line. The crucial point try, however, was no good, and Ione retained a slim lead, 13 to 12.

With four minutes to play, Hams broke through on a sneak and ran 20 yards to score. The kick try was no good, and the Cards had the lead that was to hold, 19-12.

St. Jo fumbled with two minutes to go and Jim Martin recovered for the Cards. Martin's

work may have saved the day for the Ione club because the Pendleton team was on the Cards' 15-yard stripe at the time. After the fumble recovery, the Morrow county team went right back downfield, however, and had it on the St. Jo 20 at the gun.

Coach Biehl praised the St. Joseph defense as being very strong but said that the Cards' defense was just as good. Among standouts on defense for Ione were Jerry Davidson, Les Madden, and Marvin Padberg, guards; and Martin, defensive right end.

First downs showed a slight edge for Ione, six for them to five for St. Joseph.

Ione	0	6	7	6-19
St. Jo	0	6	0	6-12

Mrs. August Barlett, The Dalles, arrived last week to visit her daughter and family, Mr. and Mrs. Earl Ayres.

**TRYCO ANNOUNCES**

THE ADDITION OF THE  
**BEHLEN LINE OF STEEL BUILDINGS**

**All-Purpose, All-Steel Farm Building**

**Behlen Curvet**

Almost Straight Side Wall Capacity... at 30% Less Cost

The All-Steel Behlen Curvet is an ideal all-purpose farm building. It can safely store both grain and machinery at the same time. It costs approximately 30% less than most straight-wall buildings of the same capacity. It can be built to any length (in 40-foot widths). And, it can be easily expanded at any time.

What's more, the Curvet is Leak Proof. All seams are sealed with non-aging rubber strips to keep weather, vermin, and insects out. Galvanized 1/2-inch bolts are placed every 6 inches along the seams for added strength and "tightness."

Behlen's channel-ridge panels hold grain 12 feet high against sidewalls. Ceiling is 18 ft... giving "extra" room for machinery storage.

Grain-Hay Storage  
Machinery-Tool Shelter  
Calving Barn  
Milking Parlor  
Potato Warehouse  
Repair Shop  
Loafing Barn

We can quickly erect a Behlen Curvet on your farm. See us now for complete details.

**Basketball Drills Slated November 1**

With football season nearing its end, thoughts of basketball are in the air at Heppner high school.

Bob Cantonwine, jayvee football coach and head basketball coach, said that about a week's rest will be allowed the high school athletes after football season and basketball practice will start around November 1.

## Waterfowl Season Opens October 21

Waterfowl gunners will have 75 consecutive days extending from noon, October 21 through January 3 to hunt ducks and geese on Oregon marshlands. These were the dates set for the 1961 waterfowl season selected recently by the game commission within the framework of the federal migratory regulations.

Bag limit on ducks will be 4 daily, 8 in possession. Eastern Oregon shooters along the Columbia and Snake rivers were allowed 2 bonus mallards in the daily bag and 4 additional mallards in possession. The bonus mallards may be taken in Wasco, Sherman, Gilliam, Wallowa, Union, Baker, and Malheur counties. Canvasback and redhead ducks remain on the protected list and cannot be taken. One wood duck was allowed in the daily bag.

Bag limit for geese was set for 6 daily or in possession. Only 3 geese of the dark species may be taken in the daily bag.

Hunters were allowed 25 coot daily or in possession and 5 merganser per day, 10 in possession.

The brant season along Oregon's coast line was set for Dec. 2 through January 30, with a bag limit of 3 brant daily or in possession.

Wilson snipe may be taken for 30 consecutive days from October 28 through November 26. Bag limit is 8 per day, 8 in possession.

**How Shell N-Sol® 32 turns plow-down problems into profits**

Read why Shell N-Sol® 32 is the ideal liquid nitrogen solution to speed up decomposition of crop stubble before the next planting.

Plowed-under stubble can either rob or enrich your soil's growing power. It all depends on how fast and how fully the stubble is decomposed before next planting.

Now you can turn this problem-maker into a profit-maker in one easy step -- by plowing-down with Shell N-Sol® 32 liquid nitrogen solution.

**Bacteria Need a Boost**

Nitrogen doesn't decompose stubble directly. It works behind the scenes, speeding up bacterial action which actually does the job.

Shell's liquid nitrogen solution gives bacteria this essential boost faster for two important reasons:

1. The nitrogen is already dissolved -- ready for immediate use
2. The nitrogen is in direct contact with stubble surfaces, almost as if you had painted it on.

What's more, the Shell nitrogen solution you apply at plow-down helps get your next crop off to a growing head start!

Shell N-Sol® 32 (urea-ammonium nitrate solution) provides 32% nitrogen in three different forms -- urea, ammonium and nitrate.

Stubble fertilization is also easier with this Shell urea-ammonium nitrate solution. Shell N-Sol® 32 can be applied through sprinkler systems, or sprayed over rough, plowed-up soil by ground rig or airplane.

**Sure Benefits**

Better tillth, improved water penetration, increased humus and plant nutrients result when you spray your stubble with nitrogen at plow-down time. Contact your local Shell solutions dealer today.

For other sources of fast-acting nitrogen, choose the Shell brand of urea, ammonium sulphate, or NH<sub>3</sub>.
