Reddy Kilowatt's Helpful Hints

HOW TO MAKE YOUR HEATING DOLLAR GO FARTHER!

- Make certain your house is well insulated, and that your doors and windows are weather-stripped. This cuts heat loss and gives you more value for your heating dollar.
 - Try to keep drapes drawn and shades pulled at night and in rooms not in use because heat passes readily through window glass.
 - You can save heat by closing off rooms at night where windows are raised. If the room has a separate thermostat, set it as near the outside temperature as possible.
 - If your furnace has air filters, keep them clean. Dirty filters slow down air circulation and make your furnace work harder.
- Reddy Kilowatt hopes these hints will help save you heating dollars. And remember, Reddy's always at your service for home comfort and convenience. Live better electrically.
