If gum were to get into your carburetor, it could lead to unexpected repairs like this. One of the nine ingredients in today's Super Shell fights gum to give you top performance.

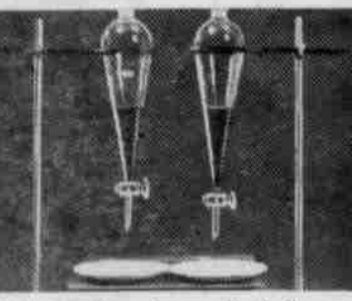

ANCIENT HISTORY:

Gasoline gum used to cause unexpected repair bills. Today, one of Super Shell's 9 ingredients fights off gum —to save you money and give you top performance.

The gum preventive in today's Super Shell is so powerful that one thousandth of an ounce is enough to treat a gallon. Read how this "chemical policeman" works.

THE MECHANIC in our photograph is about to go to work on a gummed-up carburetor. A nice little repair job.

But to Shell scientists, gummed-up carburetors are ancient history.

Drip test shows how well Shell gum preventive works. Container on left has unprocessed gasoline without gum preventive; on right, processed gasoline with Super Shell's gum preventive. Gasolines drip onto heated plates and evaporate, simulating long storage.

And so are other gum troubles. Such as sticky intake valves. And fouled automatic chokes. Here's why:

1. Shell uses refining processes that hold certain gum-forming gasoline components to a minimum.

2. Shell guards all tanks, pipes, and trucks against dirt and other gum-forming contaminants.

3. Shell includes a powerful gum preventive in Super Shell's nine-ingredient formula.

"Chemical cop" at work
 The gum preventive in Super Shell is so effective that a thousandth of an ounce is enough to treat a whole gallon of gasoline.

This remarkable ingredient has been described as a "chemical policeman." It helps to keep unstable elements in gasoline from sticking together—the way a skilled policeman prevents trouble by keeping a crowd from forming.

Hot Weather Blend
 For a quick run-down on the other eight ingredients in today's Super Shell, see box at right.

And for top performance all summer, keep your tank filled with Super Shell's Hot Weather Blend. It's specially formulated to fight engine flooding and other hot weather troubles. At Shell stations now.

Here are the 9 ingredients in Super Shell—and what they do to give your car top performance

- #1 is TCP*—for power, mileage, and longer plug life.
- #2 is Pentane mix—for fast warm-ups.
- #3 is anti-knock mix—for knock resistance.
- #4 is Alkylate to control "high-speed knock"
- #5 is Butane—for quick starts.
- #6 is "cat-cracked" gasoline—for power.
- #7 is an "anti-icer." Added when cold weather sets in.
- #8 is gum preventive—for clean carburetors.
- #9 is Platformate for extra mileage.

*Trademark for Shell's unique gasoline additive. Gasoline containing TCP is covered by U.S. Patent 2880112.
