makes billionth dollar loan repayment to REA Administrator Norman Clapp.

RURAL ELECTRICS repay billionth dollar on U.S. loans

A \$43,272.06 check from Allamakee-Clayton Electric Cooperative, Inc., Postville, Iowa, recently pushed repayment of Rural Electrification Administration loans past the one billion dollar mark. Now, more than one dollar out of every four loaned has been returnedplus almost half a billion dollars in interest!

Since the start of rural electrification in 1935, REA has advanced \$33/4 billion in long-term loans to nearly 1,000 locally-owned rural electric systems. Rural people have used this money to build their own electric lines . . . the only way they could get electricity.

They've helped boost the number of farms with electricity from 10.9 to 97 per cent. And today,

rural electrics are bringing the most modern electric service to residences, farms, churches, schools, and businesses all over rural America . . . serving more than 17 million people.

Best of all, their loan repayment record is 99.99 per cent "perfect" . . . one of the finest in banking history. Rural electrics are making regularly scheduled payments on principal and interest. And in addition, they have already repaid more than \$170 million ahead of the dates it was due.

In all these ways, locally-managed rural electric systems continue to demonstrate that rural electrification, financed by REA loans, is one of the soundest investments our Nation has ever made.
