

Boardman Council Works Towards Codification

By MARY LEE MARLOW
BOARDMAN—The Boardman city council approved an application for a package store Class B license presented by Wiley J. Brimmer at the regular monthly meeting last week.

Mayor Joe Tatone stated he had contacted Mark Westling, planning and public works consultant of the Bureau of Municipal Research of Eugene, about codification work, and that Westling would not be able to put anyone to work on it until the middle of July.

Councilmen were asked to bring new nominees to the next meeting to replace Ray Conyers, who resigned due to moving away from Boardman.

The next meeting of the council will be August 6 at 7 p.m.

P. O. Gets Second Class Rating
 Mrs. Flossie Coats, postmaster, has announced that the local post office is now a second class office as of July 1. This was due to a large influx of advertising mail going through the office the past year. The post office has been third class since Mrs. Coats became postmaster in January, 1954, and for several years prior to that.

Baker Rites Held July 1
 Funeral services were held at Burns Mortuary in Hermiston last Friday for Adaline Gent Baker, 67, who died July 1 in Pomona, Calif.

Palbearers were Vernon Russell, Ralph Skoubo, Ronald Black, Franklin Ball, Delbert Ball and Delmer Hug.

Mrs. Wayne Kuhn and Mrs. Ronald Black sang duets, accompanied by Mrs. Albert Partlow, Irigon.

Burial was in Boardman River-view cemetery.

Grocery Changes Hands
 Mr. and Mrs. Walter Hayes

have sold their grocery store to Mr. and Mrs. Wiley J. Brimmer, who took possession last week. The Hayes have operated the store for almost 13 years, coming here in November, 1949. They moved to the former Elvin Ely place in the west end, now owned by Mr. and Mrs. Arthur Allen.

San Francisco—Super Shell with Platformate has just delivered a mileage bonus of 4.33 percent. Platformate is Super Shell's mileage ingredient. Shell engineers test Super Shell for mileage in many different types of cars, in many different places. Here's how the test above was run. Exactly 250 cc (about half a pint) of a fuel blended without Platformate was fed into the test car's engine. The car was started, accelerated to 30 miles per hour, then held there until fuel ran out and the car rolled to a stop. Distance: 6186 feet (indicated by dotted line in background). Next, test was repeated, using Super Shell—the same fuel as before but with Platformate added. Precise same volume of fuel. Same car. Same speed. Same driver. Same conditions. Distance: 6454 feet. That's 4.33 percent farther than the car traveled with non-Platformate gasoline.

MILEAGE TEST

New documented tests prove that one of Super Shell's 9 ingredients packs extra mileage into every gallon

The picture above was snapped a few moments after Super Shell with an extra mileage ingredient called Platformate delivered a mileage bonus of 4.33 percent. That's a typical result from a series of mileage tests Shell engineers recently ran on the outskirts of San Francisco. The tests compared two gasolines. One was a gasoline Shell scientists purposely blended without Platformate. The other was Super Shell—the same gasoline as before but with Platformate added. Shell engineers used a 1962 convertible for the tests. You may be driving a similar car right now. In test after test, Super Shell with Platformate consistently took the car about 4 percent farther than the gasoline blended without Platformate.

NOTE: For more details on these tests, see caption under picture. And for technical data, write to the Shell Oil Company, 50 West 50 Street, New York 20, N. Y.

Platformate gets its name from the platinum re-forming process used to make it. Pressures up to 600 pounds per square inch and temperatures up to 1000 degrees literally tear petroleum apart. A precious platinum catalyst then helps re-form the petroleum into super-energy components. RESULT: Platformate can release more energy per gallon than the finest 100-octane aviation gasoline. Your engine can convert extra energy into extra mileage.

Super Shell has 9 ingredients for top performance

Extra mileage is just one part of the top performance story. Super Shell's other ingredients complete the picture. Here's what they are and what they do.

TCP* for power, mileage, longer plug life.
Pentane mix—for fast "warm-up."
Butane—for quick starts.

- Anti-knock mix**—to resist all kinds of knock.
- Alkylate**—to help control "high-speed knock."
- "Cat-cracked" gasoline**—for power.
- Anti-icer**—added in cold weather to help check carburetor icing stalls.
- Gum preventive**—to help keep carburetors clean inside.

Now... test drive the NEW 'JEEP' TORNADO-OHC ENGINE

You'll be amazed at its performance!

Presenting the Tornado-OHC, America's first overhead camshaft engine designed specially for commercial vehicles. **WHAT IS AN OHC ENGINE?** In a conventional engine, the valves are on top—the camshaft, which operates them, down below. The Tornado-OHC has overhead valves and an overhead camshaft—which is what OHC stands for. The simplicity of this system—it has 36 fewer moving parts—makes it much more efficient. It produces 33% more power with up to 25% better gas economy—needs less maintenance and lasts much longer. **COME IN AND TEST DRIVE THE TORNADO-OHC ENGINE**—now available in 'Jeep' Pick-ups, 4-wheel drive Utility Wagons, 2-wheel drive Station Wagons and Panel Deliveries.
