Shell dealers suggest 7 things to tell your son when he first borrows the family car

1 Don't take other drivers for granted.

They sometimes do unexpected things. In the U.S. in 1960, they ran into stationary objects more than 150,000 times.

So don't be too optimistic. Cars backing out of parking spaces do sometimes back out blindly. Cars coming from the other direction might swing into your lane—especially on hills and curves.

Your best protection is to drive defensively. The only driver you can really be sure of is yourself.

2 If the car won't start, there are a number of simple things worth trying. Use the starter in short bursts. Press accelerator to the floor once, then hold it there while you try starter.

With manual shift, keep clutch pedal all the way down. With automatic transmission, jiggle lever to make sure it's in neutral.

Note from Shell: We recently published an advertisement with 7 simple starting tips. For a free copy, write to the Shell Oil Company, P.O. Box 272, New York 46, N.Y.

3 Courtesy is contagious—and adds to everyone's driving pleasure and safety. Nobody ever cured a traffic jam by losing his temper. If you can keep your sense of humor and wait your turn, everyone will probably get where he's going sooner. Including you.

Another suggestion: It takes only seconds to let someone enter the roadway ahead of you, but it can save the other driver minutes. Just remember to signal the car behind that you're slowing down or about to stop.

4 Cars respond to good care. Have the oil, battery and water checked every time you stop for gasoline.

When you're driving, listen for unusual mechanical sounds. If you hear one, have it checked right away. It could save a big repair bill later on.

On rough roads, take it easy—tires are tough, but they are destructible.

Note: For a free copy of Shell's 12-page booklet, "44 ways to make your car last longer," write to the Shell Oil Company, P.O. Box 272, New York 46, N.Y.

Many a young man first borrows the family car for a summer dance. On this page, your local Shell dealers offer some driving tips that can be useful to him all his life.

5 Remember what you learned to get your driver's license, and you'll be a better driver. Eight out of ten car accidents stem from improper driving practices—such as speeding, failing to yield right-of-way and following other cars too closely.

Truck drivers and other professionals have very few of these accidents—mile for mile, about one-quarter as many as other drivers. The professionals know the rules of good driving—and obey them.

6 If you're going to be late, call home. And if car trouble is the reason, call the nearest service station, too.

Park off the traffic lanes and wait in the car until help arrives—with the hood up to show you're disabled. Making repairs close to a busy road can be dangerous.

Note from Shell: Over 12,000 of our dealers go to special training schools each year. There, they learn how to spot trouble in a hurry. A Shell dealer can be helpful to you in almost any emergency.

7 Have a good time. So far, almost everything you've heard about cars has to do with safety.

Now you're about to find out what a

pleasure they can be. Here are the keys. Just take your responsibilities in stride. And have fun.

Comforting fact for parents: Drivers with less than three months' experience account for very few serious accidents. That's a good sign that most new drivers do take their responsibilities seriously. So you can relax.
