Morrow Wheat Growers Named On Committees

By N. C. ANDERSON

Morrow county wheat growers were in popular demand in Pendleton last week as committee assignments were made by the Oregon Wheat Growers League Executive Committee meeting for the first time in 1963. Of the seven main standing committees, Mrs. Milton Morgan, lone, was chosen to head the domestic wheat utilization; Robert Jensen, the marketing and transportation; Walter Jacobs, public relations; with Louis Carlson named as vice-president of federal agricultural programs. In addition several of our growers were named to special committees that will be active during the year. Milton Morgan, lone, is first vice-president of the league elected at the annual meeting in Portland last November. One of the leading discussions at the executive committee meeting was that of making a definite recommendation to go to legislature relative to 2, 4-D usage.

Morrow county recommendations drafted at our December 20 meeting were considered. Briefly, those adopted by the Milton-Freewater-Oregon Wheat League Growers at their December 27 meeting and approved by the executive committee were: (1) that the use of isopropyl ester of 2, 4-D and its volatility equivalents be restricted in the state of Oregon for 2 years, (2) that the use of butyl ester of 2, 4-D be restricted in the present secondary restricted area of East Umatilla county chemical control district, (3) that no spraying of 2, 4-D be done when wind velocity exceeds 15 m.p.h., (4) that research by OSU on the 2, 4-D drift damage problem be continued, (5) that government agencies using 2, 4-D be required to pay the Oregon tax to the research project, (6) that the Washington State Department of Agriculture be asked to restrict the use of isopropyl ester of 2, 4-D in Benton, Columbia, Franklin and Walla Walla counties in the state of Washington, (7) that OSU be asked to extend its educational activities relative to the proper use of pesticides including weedicides.

Dates for the 1963 annual meeting were set as December 2, 3 and 4 with Portland to again be the site of the annual meeting.

Hit High Production Mark

Seven Yorkshire sows on the Kenneth Smouse ranch near Ione evidently have not heard USDA predictions that pig production will be down in 1963. Recently seven sows farrowed 79 live pigs which is a fraction over an average of 11 pigs per sow. This is an excellent farrowing percentage in anyone's "pig parlor."

Wheat Acreage Diversion Explained By Freeman

Everyone has been reading about the 1964 wheat program and what the regulations might be. While there have been a lot of articles published in farm papers, farm magazines, daily newspapers and other publications, some excerpts from an address given by Secretary Freeman at a meeting of national farm organizations and cooperatives might be of some value to those who have been concerned.

Farm acreage allotments in 1964 will be only 10 percent smaller than in 1963. Most individual farm allotments for the 1964 crop will be the same as allotments for the 1963 crop. Each farmer will know his farm allotment before the referendum—it may be identical to the allotment he had in 1962.

Diversion payments for the 10 percent reduction in the allotment will be at thirty (30) percent of the support level times the normal yield on the farm. If a farmer's normal yield is 25 bushels per acre and his county support level is \$2.00, then his diversion payment on an acreage equal to 10 percent of his 1963 allotment will be \$15 per acre.

A voluntary acreage diversion program, similar to the programs for the 1962 and 1963 wheat crop, will permit any farmer to reduce his plantings up to 20 percent below his allotment. This voluntary program is over by about 150 million expected to reduce wheat carry-bushels in the 1964 marketing year.

Payment rates for the voluntary program will be at fifty (50) percent of the support level—\$25 per acre on a farm with a normal yield of 25 bushels per acre and a national average county support rate of \$2.00 per bushel.

Price support for wheat, including marketing certification, will be \$2.00 per bushel (national average). This level of support will apply for about 925 million bushels, 86 percent of the expected crop of 1,070 million bushels. Price support for non certificate wheat will be announced later, and will be about \$1.30 per bushel.

Advance payments will be made at the time of sign-up, for both the first 10 percent di-

version, and for the voluntary diversion.

We hope to be able to authorize production of special crops, such as safflower, sunflower and castor beans, on the diverted acreage. However, the 1964 growing season is a long way off. Announcements on these crops must be delayed for some time, since the law provides they must not be in surplus if they are grown on diverted acreage.

Wheat production on feed grain acreage will be authorized—if there is a free grain program in effect for 1964. This provision not only will allow wheat to move more freely in the market, but also will provide more flexibility for the farmer in the management of his farm. It will be a major step towards these two goals which all of us share.

Marion D. Thomas, agricultural economist, OSU, says that without approval in the referendum, the Secretary sees 1964 wheat prices at about \$1.00 a bushel, more acres, more bushels, less farm income, less spending by farmers, international complications and unfavorable impacts on feed grain growers and feed grain users.

Mel Smith Dies Suddenly

Livestock growers who have had occasion to meet and know Mel Smith, District Agent, U. S. Fish and Wildlife, while attending annual and committee meetings of our livestock association will be saddened to hear of his untimely death. Mel passed away Saturday, January 12, after working all day on their small ranch out of Portland. He had only recently had a complete checkup and pronounced in very good physical condition.

Tax Material Available

Dr. Grant Blanch, a participant in the tax panel held as a part of the Livestock Association annual meeting on Friday, January 11, has written that the afternoon discussion was enjoyable. He sent material and the reproduction of the charts that he presented as a part of the panel. Someone asked him for this material, the name of whom he has no record. If this person is among our readers we have the material for them.

Angus Sale Set for Saturday

An opportunity that has not been presented before in this area is a sale sponsored by the Oregon Angus Association to be held this Saturday, January 26, at the Umatilla County Fairgrounds at Hermiston. The sale starts at 12:30 p.m. Forty-three Angus bulls and 18 females will be offered from leading breeders of Idaho, Washington and Oregon. With many of our cattlemen going into cross-breeding and with the shortage of good Angus bulls this should be an excellent opportunity to buy bulls of excellent quality to be used in this cross-breeding program. Sale catalogs are available at our office.

'Cowless' Milk on Market

Dr. Frank Wokes, director of the British Vegetation Center, England, reports that man-made milk, using peapods, cabbage leave and weeds has been perfected in their laboratory. They are now able to remove the "green" color from their artificial milk and hope to open a pilot plant this year with large scale production to follow. The "cowless" milk will be on the market in dry form, as condensed.

Cooking Club Meets

The Eager Cookerets 4-H club had a business meeting and completed their project. Another meeting is planned for February 9 at the home of Diane Cutsforth. Those present were Susan Proudfoot, Sarah Witherrite, Jeanne Daly, Michelle Miller, Judy Barclay, Diane Cutsforth, Tana Rauch and guests, Alene Boyajeau and Sharon Witherrite. Our leader is Mary Doherty. Jeanne Daly, reporter

See Demonstration

How to use measuring cups and spoons was demonstrated by our leader, Mrs. Robert Abrams, at the meeting of Kettles and Spoons 4-H club. She told us how we would have to demonstrate at the county fair. Seven girls attended the meeting held at Mrs. Abrams'. Susan Melby, reporter

sed milk, and a liquid. What next?

Annual Gilt Sale Announced

The Oregon Swine Growers Association has recently announced its 18th Annual Bred Gilt Sale. Thirty gilts of popular breeds will be sold at the Oregon State Fairgrounds in Salem on February 2 starting at 1:00 p.m.

Applications Open Now For Sheep Shearing School

For the past approximately 15 years OSU Extension Service has been sponsoring two-day sheep shearing shortcourses. These shortcourses have been practical in that quite a number of persons have been trained in the principles of sheep shearing and with some practice and experience have been providing quite a service to their community in shearing sheep especially farm flocks that we have so much trouble in getting sheared. At the same time they have been performing this service they have had an opportunity to make some good wages.

Ronald Baker, former 4-H club member, now a feedlot operator near Hermiston was the first Morrow county boy to enroll in one of the first sheep shearing schools offered in Oregon. Over the years a number of boys from Morrow county have taken this training and have been available for shearing sheep. While none of them have taken up sheep shearing as a profession here, I heard just the other day of a boy from Wheeler county who had taken this training and who has been doing some shearing there had left for Australia to work with a sheep shearing crew. We have not had anyone attend these schools recently, however there may be someone interested now.

Recently announced are schools for 1963. There will be four held beginning March 11 at Corvallis, three of the schools to be held simultaneously there; the last to be held at Union on March 25 and 26. We have enrollment application forms at this office for anyone who might be interested.
