Your Home Agent
Sewing Machine Clinics Scheduled At Unit Meetings

By ESTHER KIRMIS

A good sewing machine is one of the most lasting pieces of equipment in your home. You may even have a sewing machine that has served several generations but is still a useful piece of equipment. Often such a machine needs only a thorough cleaning and some adjustment to put it in perfect condition.

Realizing this, the women of the Extension units have requested that your agent visit them during the month of April to conduct sewing machine clinics on cleaning and adjusting.

Bring your sewing machine to the meeting, if possible, and you can work on them right there.

You will need the following materials: a small paint brush, small oil can for kerosene (I'll bring the kerosene), screwdriver, sewing machine oil and lubrication tube, orangewood stick or long needle, two pie plates, newspapers and rags, thread and a piece of fabric, the instruction book to your machine and an apron to protect your clothes.
