Ullman Urges Wheat Farmers To Tell Problems

"Our wheat farmers must make every effort to impress Congress and the American people with the basic facts on wheat production — that they cannot exist on the anticipated wheat price of \$1.25 a bushel," declared Congressman Al Ullman in a telephone conversation with officials of the Oregon Wheat Growers League.

Ullman advised producers to express themselves in a variety of ways in order to acquaint the American public with their problems. He said that individual letters to congressmen from farmers and farm groups are a must, and should be reinforced with publicity on farm operating costs.

"The needs of the wheat economy must be based on cold facts, not emotion," Ullman stressed. "Farmers must present an objective case which clearly demonstrates that their operating costs exceed \$1.25 a bushel, and that a program of reasonable government support is mandatory if we are to avoid a disaster in our wheat economy."

He added that such a slump would have serious effects on other farm commodities and on the economy as a whole.

The Democratic solon told Wheat League executives that he has discussed the need for a voluntary certificate program of wheat supports with President Kennedy and Agriculture Secretary Freeman. He feels their support is assured if wheat growers will develop a grass roots "selling program" to put their story across. Such an effort, Ullman stressed, must clearly express the feeling of the great majority of growers, not just a few.

The Oregon representative emphasized his continuing efforts to amend existing farm legislation to place it on a voluntary participation basis and expressed confidence in the passage of such a bill in 1964 if producers express their desire for it.

OSU Maps Federal Land In Oregon; Acres Total 51%

OREGON STATE UNIVERSITY —The 51 percent of the land of Oregon that is owned by the federal government has been charted on a first-of-its-kind map for the state by an Oregon State University graduate student in the Department of Natural Resources.

Twenty-one federal agencies own 31,915,902 acres of Oregon's 61,641,600 acre total, the study notes. County percentages range from 74 per cent in Malheur and Deschutes counties to 1 per cent in Clatsop county.
