Mann Declares Beef Agreements Are 'Ridiculous'

An assertion that the United States State Department agreements with New Zealand and Australia limiting beef imports to this country are so favorable to those countries that even their own Meat Boards were shocked, was made last Thursday night in Pilot Rock by Irvin Mann, Jr. of Stanfield.

"In the last two years these beef imports have increased three to four-fold," said Mann. He said this was a calculated

action on the part of these countries as the agreed quotas are based on an average of the last two years, with an automatic 3.7% increase each year which guarantees the two countries an even greater share of the U. S. meat market in the future.

"American cattlemen have been in close contact for many years with the Australian Meat Board, which controls meat exports, and could have made a decidedly more favorable im-

port agreement with them than our state department did," Mann stated. "In an effort to bolster the sagging beef economy the Secretary of Agriculture has bought seven and one-half million dollars worth of canned beef in natural juices since March 2. At the same time he is buying this U. S. grown beef they refuse to lower import quotas on beef of the same class.

This is a paradox I fail to understand."

Mann also said that east Oregonians must try to convince the western Oregon metropolitan area representatives in the legislature of the importance of a broader tax base for the state.

"Property taxes in eastern Oregon are already so high they are crippling the agricultural economy. We must have a broader tax base or risk losing much of agriculture's contribution to the state's economy," said Mann.

As a Tiger trainer for the past 17 years, I have found that athletic endurance is directly related to smoking. I advise young prospective athletes not to smoke under any circumstances and older athletes to give up cigarette smoking for better performance.

You may have seen stories about me quitting cigarettes. Cigarette smoking is dangerous for your health. Before you start smoking, look long and hard at the facts about cigarettes and lung cancer. Think it over—is smoking worth it?
