Turner Youngest Conservation Man

HEPPNER GAZETTE-TIMES. Thursday. June 4, 1964

BY N. C. ANDERSON

With conservation always in his mind, Kenneth Turner, Sand-hollow community rancher, is the youngest farmer yet chosen for this distinguished honor the youngest farmer yet honor for this distinguished honor since its inception 15 years ago. Kenneth, 29, has developed a comprehensive conservation pro-gram on the 2,694 acre wheat and cattle ranch, a part of which was homesteaded by his great-grandfather Christopher Colum-bus Turner in 1884. Leasing the ranch after his father's death in 1956, Kenneth, graduate of Oregon State University, began an enthusiastic program which now includes grass and alfalfa rotations for hay and pasture, diversion ditches, contour strip cropping, sod waterways, ponds, channel improvements, pasture rotations, and stubble mulch. Selecting Turner as a result rotations, and stubble mulch. Selecting Turner as a result of this outstanding piece of con-servation work for the title of "1964 Conservation Man of the Year" were Bob Jepsen, Ione, chairman, representing Morrow County Wheat Growers assoc-lation; Garland Swanson, Ione, 1963 winner of the conservation title; Roger Palmer, representing title; Roger Palmer, representing the Heppner Soll Conservation district; and Fritz Cutsforth, member, county ASC committee. Nels Anderson, county agent and Ralph Richards, Soil Conserva-tion Service were ex officio members.

Descendant of Pioneers Kenneth, the fourth generation on the farm, is from pioneer stock, descending from great grandfather Christopher Columbus Turner who in 1884 along with Squire L. Turner and Gran-ville McCarty, claimed 3 home-steads and 2 timber cultures steads and 2 timber cultures which are now part of the present farm. In 1885, grand-father Robert Willis Turner homesteaded an adjoining 160 acres. Additional tracts were bought and in 1918 Samuel J. Turner, Kenneth's father, took over the operation. In 1942 more over the operation. In 1942 more farm land was purchased from Harold Cohn. Upon his father's death in 1956, Kenneth leased the ranch from his mother, Nora C. Turner. Mrs. Turner is the daughter of James D. and Katheryn Doherty, early Morrow

county settlers. The 2,694 acre ranch includes 1,079 acres of crop land grass and alfalfa seedings in soil bank now totals 275 acres which have been laid out since this program came into being. There are 210 acres of grass and al-falfa rotations which include 14 acres of sprinkler irrigated al-falfa at the ranch headquarters. This hay provides the needed winter feed for 60 cows and calves maintained on the ranch. There are 1340 acres of range land which are utilized for graz-ing as well as the crop after-math and grain diverted in the farm program, Twenty-five acres of dryland alfalfa also provide feed. Pastures are rotated with eight pastures ranging from 100

ONE OF THE big diversion ditches that prevent erosion on the ranch of the 1964 Conservation Man of the Year is shown bet (G-T Photo)

A LUSH stand of alfalfa, nearly knee-high, is irrigated from a port (just out of the picture at the right) on the place of Ken Turne 1964 Conservation Man of the Year. (G-T Photo

THIS IS HOW farm pond on the Ken Turner place looked before moss intruded. It is about $2l_2$ feet deep at the present time.

Notice of Budget Hearing

The budget for City of Heppner for the fiscal year 1964-1965, beginning July 1, 1964, as detailed and summarized in the accompany-ing schedules, was prepared on an accounting basis consistent with that used in prior years. Major changes, if any, and their effects on this budget are set forth in an accompanying statement. A copy of the budget document may be inspected by interested persons between the hours of 9 a.m. and 5 p.m. at Recorder's Office. City Hall. A meeting of the City Council will be held the 15th day between the hours of 9 a.m. at City Hall for the purpose of holding a public hearing on this budget. Any person may appear to discuss of June, 1964, at 8:00 p.m. at City Hall for the purpose of holding a public hearing on this budget. Any person may appear to discuss the budget, or any part of it.

Signed: AL LAMB, Chairman of Governing Body

Ranges Improved A range improvement program on heavily infested sage brush land led the way in setting an example of what can be done in a clearing, shaping and seed-ing program. One hundred twenty two acres of dryland al-falfa and grass seeded on this area provides an abundance of pasture which have allowed the Turners to increase their beef herd. Before, it was a jungle of herd. Before, it was a jungle of heavy sage brush with little, if any grass produced. The first contour strip crop-

ping was established soon after the ranch was leased by Ken-neth in 1956. Strip cropping was expanded to the Cohn place in 1963 which now with a network of diversion ditches, protects this operation from soil erosion. Fre-quent cloudbursts have made erosion a severe problem in this area. The steep land aggravates the situation but 11 diversion ditches with a combined length of 4.2 miles, the 245 acres of strip cropping, three sod watership cropping, three sod water-ways, 534 acres of grass seeded since 1957, combined with an all stubble mulch fallow pro-gram provides the safety pro-tection, provides the safety protection necessary in at least normal conditions.

normal conditions. Kenneth, experimenting con-stantly with new conservation equipment, follows a program using chisel plow with curled shanks to work the heavy soil in his area sufficiently, skew treaders and center drive weed-ors for handling heavy stubble. ers for handling heavy stubble Equipment is hydraulically controlled to get over sod waterways with easy maneuverability. Deep furrow drills, again with hydraulic hitch, are used in seed-ing stubble mulch in the fall. A sub-soiler is used wherever hard-pan or restricting layers cause need for opening the ground for better root and water penetration.

Cooperates In Weed Control Kenneth, active in many community affairs, has been interested in conservation and better farming practices since his re-turn to the farm. Chairman of the Morrow County Wheat Growers association of the production and land use committee for the past six years, he has, through his constant interest and en-couragement, provided incentive for weed control research and conservation farming. He has been a constant cooperator in weed control methods to determine new chemicals for the conmine new chemicals for the con-trol of perennial as well as an-nual noxious weeds. The first TBA, now used extensively in Morrow county as a means of controlling field bindweed, (Wild Morning Glory), was first test-ed and tried on his ranch.
