Branch banking can be done in many places besides the bank itself. Here a bank manager and stockman survey a modern feedlot operation, with white-faced Herefords representing cash on the hoof.

As the livestock industry turns more and more from range land operation to the systematic weight production of feed lots, livestock producers find themselves in need of new management skills and financial support.

In virtually every part of Oregon First National provides banking service when and where needed, by people who know local conditions and the needs of the people they serve.

Your local branch of First National is part of a century-old, billion dollar bank, one of the nation's leading financial institutions. Its people know how business is done in your community. Resources, knowledge and experience make the finest banking service, and you get more of all three at First National.

John Locke, assistant manager of the Heppner First National Branch, is part of a friendly staff whose years of banking experience total 100. Consult these hometown people for every banking need.
