The Lively Five 4-H club met at Glenda Van Winkle's on November 7. The meeting was called to order by our president Nancy Doherty. Jeannine Hunt and Glenda Van Winkle led the flag salutes. We discussed buying or making flags for our club. We talked about what we are going to make and what materials we are to use.

Our next meeting will be at the home of Jeannine Hunt on November 28. Jill Padberg is going to give a demonstration on how to press wool. We are thinking about what we are going to do for community service this year. The meeting was adjourned and refreshments were served.

The 1965 Ford rides quieter than a Rolls-Royce!

"This ad kills me..."

"Incredible!"

"Ridiculous!"

"Far fetched!"

"Hooley!"

To the 5 out of 10 people who didn't believe this ad... a sporting proposition

Take a no-obligation test drive in a 1965 Ford. Maybe you just couldn't believe the ad (reprinted above) which appeared in this paper a few weeks ago. After all, many consider Rolls-Royce to be one of the world's finest cars. But Ford does ride quieter. The world's leading acoustical experts (Bolt, Beranek and Newman, Inc.) made the tests. The U.S. Auto Club certified the results.

This year's Ford has the strongest body ever... a revolutionary new frame that "tunes out" vibrations... new ultrasoft coil-spring suspensions—all contributing to the new hushed ride. But the ride is only part of what's new.

- New swept-back instrument panel adds five inches extra knee room.
- Transmission tunnel is lower than in competing cars for extra foot room.
- Trunk has more usable space than ever—holds four 2-suiters standing upright.
- New ultra-luxurious LTD series—unmatched by any other car in Ford's class.
- Silent-Flow ventilation (standard on 4-door hardtops) removes stale air, provides fresh air even with all windows closed.
- Exclusive new twin-edge key—works with either side up.
- Hot, but hushed, 289-cu. in. V-8 is standard equipment in XL and LTD models.
- Smooth, thrifty all-new Big Six in other models—the most powerful standard Six offered by any car in Ford's class. V-8 options to 425 hp.
- All Ford automatic transmissions have 3 speeds, not 2 as in many competing cars.
- Fully synchronized manual transmissions—you can even shift down to first without clashing gears.

If all this sounds like a lot for one car to offer... take a test drive. See why more people are buying Fords than ever before in post-war history.
