His father's '65 Ford rides quieter than his father's Rolls-Royce

We know it's hard to believe a Ford could ride quieter than the famed Rolls-Royce. But it's a fact. Leading acoustical consultants conducted tests in which three V-8 powered Fords (Galaxie 500 Sedan, new Galaxie 500/XL and LTD Hardtops) with automatic transmissions rode quieter than a new Rolls-Royce. The tests were certified by the U.S. Auto Club. Of course, the best test of all is to get behind the wheel yourself... and listen to a '65 Ford in action.

That's what Chuck's father did. Ford's quietness really impressed him. But it wasn't the quietness alone that sold him. He shopped around and found that Ford offers features and models and quality that simply aren't matched by other cars in its class. For example:

- 100% new body—strongest Ford body ever.
- New frame "tunes out" vibration.
- Decorator-appointed interiors in LTD's, thick nylon carpeting.
- More luggage space than in most competing cars—trunk holds four 2-suiters standing upright with room left over.

- Thrifty, quiet new Big Six—the biggest Six offered by any car in Ford's class... 289-cu. in. V-8 in XL's and LTD's.
- All automatic transmissions have three speeds, not two as in some competing cars—smoother shifting, more economy.
- Silent-Flo ventilation (in 4-door hardtops) provides fresh air in car with all windows shut.
- Handy reversible key works either side up.

There's more... much more in a Ford than you'd expect for the money. Visit your Ford Dealer and take a test drive soon.
