Rainbow Girls to Aid Heart Week Canvass For Heppner, Ione

Morrow county's 1965 Heart Week volunteer army will be on the march next week to give every community resident in the county a personal opportunity to fight the nation's number one health enemy—diseases of the heart and blood vessels.

Members of Ruth Assembly No. 50, Order of Rainbow for Girls, will visit homes in Heppner and Lexington on the evening of Thursday, February 18, to accept contributions to the Heart Fund, and, as educational ambassadors, to distribute pamphlets containing heart-saving facts.

Rainbow Girls from the Ione area plan to carry out the door-to-door campaign in that community on Saturday, February 13. Volunteers will leave an envelope at doors where there is no answer, and this may be used for mailing purposes.

Collections will augment those already in hand from special gifts, industry, business solicitation and other Heart Fund activities, thus climaxing the month-long campaign carried forward in the county to expand research, education and community heart programs of the Oregon Heart Association.

Goal of the county Heart Fund Campaign is \$800 and it is considered likely that a large percentage of this amount will be subscribed in conjunction with the residential canvass.

NOTICE To Personal Property Taxpayers

A large percentage of personal property owners in the County have failed to file their 1964 personal property returns. It is possible that filing the return can slip the mind very easily.

THE DEADLINE IS MARCH 2, 1965

Oregon law provides that any taxpayers who fail to file a return within the time fixed thereto or as extended by the Assessor SHALL BE SUBJECT TO A PENALTY.

Your County Assessor does not wish to charge this additional penalty on any taxpayer, so let's get those returns in the mail now.

After six great years like this what could Pontiac possibly come up with next?

The 1965 Pontiac: Car of the Year! That's what!

We had to reach a climax somewhere along the line. And what better climax for a car than to win Motor Trend's Car of the Year Award for 1965? Nothing could please us more, except maybe the way people are buying our cars. And they are. Drive one and find out why.

THE MODERN WAY TO HEAT

One of these ELECTRIC HEATING methods is best for you

Baseboard units simple to install: Ideal for re-modeling or new homes
There's no fuss or bother when you install Electric Heat. The job is done quickly and economically. That's because there are no expensive chimneys or duct work. Baseboard and wall units are ideal when you remodel. They can be installed as easily and quickly as a light outlet — no mess, no bother.

Most importantly, you'll be treating your family to a new level of comfort and convenience. The temperature is controlled in each individual room. Electric Heat is as quiet and as safe as a light bulb; no flames or fumes to worry about; no smoke or soot to dirty your home.

Ceiling cable system is invisible
Ceiling cable makes decorating and furniture arrangements easier because all the heating elements are

hidden in the ceiling. Furniture can be placed anywhere because floor or wall space isn't needed for the heating units. Ceiling cables are stapled to plaster laths or dryboard and then covered by plaster or dryboard. The heat radiates down... just like the sun shining from above. Thermostats control the temperature in each room so you always have the most comfortable degree of warmth. Ceiling cable is safe, clean and the most convenient way to heat your home.

Many folks install it in the bathroom floor. Feels wonderfully warm and cozy to barefeet on wintry nights!

Heat pump for year-around climate control
A heat pump is both a heating and air conditioning system. During the

winter, it heats your home; in the summer, the cycle is reversed and your home is cooled. This gives you real "climate-controlled" living. You merely set the thermostat for the "climate" you want and relax to enjoy all the comforts of total-electric living.

Installation is slightly more expensive than other heating systems but much less than the cost of two separate systems for heating and air conditioning. A heat pump costs less

to operate than other separate heating and air conditioning systems, too.

Plug in extra warmth with an electric heater.

Portable electric heaters are great when you want to heat small areas in a hurry or provide extra warmth on special occasions. Many folks use them in work shops or in basement areas.

They're particularly welcomed on cold mornings to "take the chill" out of the bathroom. Senior citizens find them wonderful to give a little extra heat for their added comfort.

Regardless of which Electric Heating system you choose, you can be sure your family has the most modern, most comfortable heating method available. It'll give you new peace-of-mind because Electric Heat is so safe. And it's dependable and economical because of low-cost rural electric power.

Whether you build or re-model, discuss your plans with the Heating Specialists at your rural electric cooperative. They have experience and ideas because they've helped so many families with problems just like yours. Proper planning of a few details, such as installing adequate insulation, will make a big difference that can save you money and make your home even more comfortable.

There's no cost or obligation. Call or visit your rural electric cooperative soon!
