## Kinzua Grades To Combine Next Year With Fossil

By VIRGINIA KELSO

KINZUA — The board of directors of Fossil School District No. 21 has announced that Kinzua Grade school will close at the end of the current school year and pupils will be transported to Fossil by bus.

This action was taken because of a drop in enrollment in both the Kinzua and Fossil grade schools. By combining the two schools each class will have its own teacher and a remedial program is planned.

Teachers will be retained on basis of seniority and professional ability. Two new buses will be purchased to transport the pupils to Fossil.

## SAVES TIME AND STEPS

# Good planning makes your all-electric kitchen even better!

### Most important room in every house

Ever notice how your family seems to congregate in the kitchen? Small wonder! After all, the kitchen is the natural family center for American living.

That's why it is so important to have a well designed kitchen. It'll save you countless steps; lets you do more work with less effort; and lets you do it quicker!

A little planning can help you do wonders in making yours a low cost model kitchen. To make best use of existing space, plan your work around your three principal activities: (1) food preparation, (2) cooking, (3) clean-up.

### Cooking area: use electricity to keep that "old-fashioned" flavor

Whether you choose a conventional "free-standing" or "built-in" range and oven, be sure you cook the modern way... with clean, safe electricity. It's the best way you can be certain of getting just the right temperature for every dish. Once you've established a superior recipe, you can repeat it time after time when you cook with electricity!

An exhaust fan over the range is a wonderful addition to any kitchen. It helps remove heat, moisture, and cooking odors. Plan adequate storage for cooking utensils near the cooking area; it'll save you hundreds of steps every day.

If a built-in unit is used, have the oven installed at eye level to save stooping and bending when you are baking. A "free-standing" range should be installed at the end of your

cabinets instead of in the middle. This will leave room for any size range you might buy in the future.

### Preparation area: have adequate electrical outlets

The two most important features of a good preparation area are plenty of working space and adequate electrical outlets for all the appliances you'll use when preparing meals.

Counters should be waist high (34" to 36") and covered with an easy-to-clean material. Avoid cracks or crevices. Your refrigerator and other food storage areas should be close by. So should mixing bowls, knives, etc.

Be certain you have adequate wall outlets for your electrical appliances and for those you'll be adding in the

future. The outlets should be on a different circuit than your refrigerator to avoid over-loading.

### Clean-up area: electricity takes drudgery from chores

Good kitchen planning can save you hours of needless work. Arrange your cabinets conveniently so there's plenty of storage for dishes and uten-

sils convenient to your clean-up area.

Today's modern electric dishwashers, with their giant capacity, lets you wash all the cooking and eating utensils at one time. And the water is super-heated to kill many

germs which might survive old-fashioned hand washing.

A garbage disposal is another helpful appliance which takes much of the "mess" from the homemaker's life. You can actually "wash" nearly all your garbage down the drain!

### Bright and cheerful as a happy home!

Lighting plays an important role in your kitchen. We suggest every kitchen have adequate "general" lighting plus additional fixtures for the preparation area. It's a good idea to have light over the sink, too.

An efficient kitchen and low-cost electric power go together to give you a better, more comfortable life. That's why today's modern homemaker has all the conveniences of her city cousins... and still enjoys the uncrowded freedom of country living!
