They're not the kind of men who often make news. But they carry American friendship—and ideas—into some of the most out-of-the-way places on earth. They are Standard Oil geologists, engineers, technicians.

They explore primitive jungles, deserts, tundras, bayous, even the ocean bottoms, for oil.

When they find oil in far-off places, many other benefits follow. The local country gains a new source of energy, new jobs, new revenues, improved living standards. American cooperation makes stronger friendly nations.
