FREEZE 'EM WHILE THEY'RE FRESH!

An electric freezer brings "super market" conveniences and economy to your home

An electric freezer is another good way you live better for less because of low-cost rural electric power!

Now you can buy seasonal specials when prices are low; keep them in your freezer to be served months later when prices have climbed two or more times what you paid! An electric freezer saves shopping trips so the busy homemaker can spend more time with her family instead of making unnecessary trips back and forth to the grocery.

Keep that garden-fresh goodness

In these modern days, every family should have garden-fresh fruits and vegetables all year. An electric freezer makes it easy to preserve so many different foods from your garden and orchard. It's much faster and not nearly so messy as old-fashioned canning methods. And frozen foods have a delightful way of keeping all that "just-picked" fresh taste.

An electric freezer can quickly pay for itself. In addition to vegetables, you'll save money on meats. Even poultry and fish will keep safely for months in an electric freezer.

Smile when guests stay for dinner

There's always extra food for unexpected guests when you have an electric freezer. No need to drive to the grocery. You have your own convenient "supermarket" right in your own home. There's always extra meals at your fingertips.

Most families find that an electric freezer adds to the variety of foods. It's so much easier to plan meals, too.

An electric freezer is another big step toward modern living. Like so many other electrical appliances, it costs only pennies to operate, thanks to low-cost rural electric power.
