ATTENTION FARMERS:

Use just 4 Shell multi-purpose lubricants to keep your farm equipment in top running shape.

There are quite a few multipurpose Shell lubricants. But the chances are that you'll only need four to cover practically all applications on your farm.

These lubricants can help you simplify maintenance and lower costs by keeping your inventory to a minimum.

Here's what they do:

1. Shell Rotella T Oil 20W/40. A multi-grade, highly dispersant anti-wear motor oil. Suitable for year-round use in all engines except diesel engines requiring a Series 3 lubricant. (For these diesel engines, use Shell Rimula Oil.)

2. Shell Spirax EP multi-purpose gear lubricant for use in extreme pressure applications and conventional transmissions. Resists foaming and

sludging. Can be used for all conventional stick-shift transmissions and differentials.

3. Shell Donax T oils for torque converters and hydraulic systems. Powerful anti-oxidant and dispersant materials help equipment stay free of sludge, lacquer and rust. Resists foaming, guards against deterioration of rubber seals.

4. Shell Darina Grease AX or MP Grease. Both are top quality, multi-purpose greases. Darina AX contains Microgel base instead of soap. So it won't melt even at high temperatures or under severe vibration. It effectively resists washing out of chassis and bearings. Shell MP Grease is conveniently packaged in 1 1/2-oz tubes for use with hand-held guns.
