## School Bells

By DAVID H. POTTER  
Superintendent,  
Morrow County Schools

As this school year draws to a close, the administrators are planning for a remedial summer program.

On April 25, 1966, our school district was granted approval of a project under Public Law 89-10, Title I. The title of this project is:

"Morrow County District-wide Summer Remedial and Cultural Enrichment Program."

This program will concentrate on remedial reading, remedial mathematics, remedial spelling, and to a small degree, remedial social studies. The program is scheduled to start on June 20, 1966, and will continue through July 29, 1966. This will allow six weeks of special work for three hours each day. The classes will be held from 9 a.m. until 12 noon. Arrangements will be made

to transport the students by small school buses. The staff will be hired from our current teaching staff wherever possible.

The program will include two classes in the Heppner Elementary School, one class in the Lone Elementary School and one class in the A. C. Houghton Elementary school. (The school district has been operating a remedial program in the A. C. Houghton school for some time, and this program will be continued).

In addition to a teacher for each class, the program calls for a teacher's aide to assist in the remedial program.

We are hoping that the teacher aides can also be certified teachers from our present staff. The administrators are currently taking applications and talking to their staff members about this program. The students will be selected

by faculty and teacher recommendation. The staff will then contact the parents and secure their permission and cooperation. In Heppner, one class will cover a class range from one through four; the other class will cover the range five through eight.

In Lone, the tentative class range is grades one through six. In the A. C. Houghton school one class will cover the class range one through four, the other class (district sponsored) will cover the class range five through eight.

As final plans are developed for this program, we will keep you informed.

### Board Meet Set

A special meeting of the board of directors of Morrow County School District R-1 has been called by Irvin Rauch, chairman, for Thursday night (tonight) in the Lone High School Library. The board will act on resignations at the meeting and hire personnel, if any suitable applications are presented. At 8 p.m. the board will meet with the county court and the lone city council to discuss flood control.

## WELL DONE

The entire community shares the pride of you and your family ...

Congratulations Class of 1966.
