**If Your Husband's Insufferable Give Him An Accutron Timepiece and Make Him Unbearable**

If there's anything worse than a man who thinks he is right all the time, it's a man who **knows** he is.

Picture him. Asking people for the time so he can tell them they're wrong. Calling the radio station to tell them they're wrong. Even calling the station to give them the correct time.

It could happen. If you give Accutron, the electronic wrist timepiece. Instead of conventional watch parts, the Accutron timepiece uses an electronic tuning fork that vibrates 360 times a second and keeps time so precise, the Accutron timepiece comes with the first guarantee of accuracy ever given.

It's so exact, the same movement is used as a timer in satellites, where an error of seconds can mean an error of hundreds of miles. But don't tell him that. Or he'll really become impossible. Accutron by Bulova.
